LEGAL REVIEW:	
DESCRIPTION:	
The term “Complete Streets” describes a comprehensive, integrated transportation network with infrastructure and design that allows safe and convenient travel along and across street for all users.	
HISTORY:	
Much of Arlington’s existing roadway system was built to facilitate access to destinations by personal automobile, resulting in streets that are uninviting and impractical for all users. Resolution 2017-021 adopts a work plan for development of the “Complete Streets” program.
