Janis –

Thank you for your comments and concerns regarding the Seattle Galvanizing Small Parts and Storage Special Use Permit. You are now considered a Party of Record for the project and your comments will be included in the Hearing Examiner staff report. The city issued a Notice of Public Hearing for the project yesterday. The Public Hearing Notice is attached. If you have property within 500 feet of the project property you will receive a post card notice of the hearing as well.

If you would like to attend the Public Hearing please do so, the link to the meeting is on the notice. The city website will be updated today with all the public hearing exhibits, along with a **DRAFT** staff report. The **FINAL** staff report will be updated online on June 26, 2024 after the SEPA MDNS Public Comment Period closes on June 25, 2024 at 5:00 pm. This will allow me time to include all the public comments received during the comment period. You may not see your comments in the draft staff report that is posted today, however I can assure you that they will be included in the **FINAL Staff Report** that is published on June 26th. If I receive comments after 5:00 pm on June 25, 2024, they will be added as exhibits on the day of the Public Hearing.

The following is the link to the city's public notice website:
<https://www.arlingtonwa.gov/310/Public-Notices-Hearings>.

Sincerely,
Amy Rusko

Subject: Hot Dip Galvanization facility

This message is from an External Sender

This message came from outside the City of Arlington

I am opposed to the proposed Hot Dip galvanization facility that is being planned on 67th St. It is a dangerous facility to build so close to residential homes. The fumes created will negatively impact the health of our residents in the area. With all the land available in the Cascade Industrial Park area, surely a location can be found that will be much more isolated from the general public.
