Subject: Galvanized plant at 18520 67th Ave

Ms, Rusko,

It's come to our attention that there is a proposal to allow a galvanize dipping plant in the city of Arlington, Right below my home.

First off, every city employee needs to research "Super Fund Sites" and realized these sites are because of lead and lead products. Duwamish River is a super fund site!

With all the rivers and tributaries going through the city of Arlington and our community, within a few months become contaminated. Lead is toxic!

Doctors and physicians recommend all children should he tested for lead poisoning, along with adults now also.

Is the city of Arlington going to be required to pay for the community to be tested?

Do not allow this plant to be approved, Super Fund Sites never go away!
