This message came from outside the City of Arlington

Good morning,

I am very concerned about my health and Arlington's residents health and you should be too. All our officials in Arlington should be concerned with our residents welfare "FIRST" before any industry is granted permission to work here in Arlington.

I am against the Hot Dip Galvanizing industry being allowed to have a plant anywhere near where residents live. The plant should be on property away from residents where it will not affect our health. The city should require safe guards that the Hot Dip metal processing company needs to secure in handling of the toxic fumes so that the lead, zinc and other chemicals are not released into the air we breathe.

Please find land that would address these issues for the chemical plant. If no land is suitable here in Arlington, I would hope you as our official representatives in Arlington would say "no thanks" to this industry.

Keep Arlington Clean. Please Don't Pollute us and our air!

Thank you for your time & consideration,  
Kathy Yeadon  
Gleneagle resident
