Ms Rusko,

Please do not approve the hot dip galvanizing process plant proposed near the entrance to Glen Eagle. Surely there must be an alternative site away from residential neighborhoods that would better suit their needs.

Although there may be safeguards and safety standards in place, there is no guarantee that these would remain or that an accidental breach might occur. To put current residents at risk is not acceptable. I'm sure those making this decision would not like this activity near their neighborhood, their children, their families, etc.

In addition, property values would decline and the overall real estate market in Arlington would be adversely impacted. The charm of Arlington would also diminish if this project were approved.

Thank you,
Kimberly Brown
