Amy Rusko --

I am a resident of the Gleneagle Community at 7727 Eaglefield Dr. I have recently been notified that a Galvanized Hot Dipping operation has applied for approval from the Arlington City Counsel. I have concerns about this type of business being allowed to do business in a residential area. I have done my research on Google and found many articles on the pros and cons of this type of business in our type of area. My hope for the Arlington Counsel is to encourage you also do your research to consider best practices and the location of this type of business. If you can guarantee me that my health with skin cancer and my husband's lung condition will not be affected by the hot dipping process, than approve, BUT if you have any reservations that this process will harm our environment, residents, and me, please deny the application.
