This message came from outside the City of Arlington

Hello,

Please accept this email as a strong vote against the hot dip galvenizing plant coming to the area of 18520 67th Ave of Arlington.

As an employee of a health insurance company for the last 2.5 decades I spend a good amount of time holding providers accountable amd measuring them for the type of well checks they give their patients. One of the tests for children is lead testing. The reason for this is “zero” amount of lead is healthy for children and adults. That amount again was “zero”. This alone should be concern enough for the company, people working there and our community. As a new resident of Arlington, we chose this area because of what is “not” here. We are a tree city and the air is fresh. (Well except for that annoying marijuana warehouse diwn on 67th) but the worst thing that does is make us all crave cheetos. I am kidding but in all seriousness.. Wherehouses and business that polute our air is not longer “cool”. These types of organizations that actually harm the people in the area is down right cruel. Once you know this and welcome them in then you become part of the movement for killing children amd adults.

I hope with all my being that you take these messages to heart. I strongly urge you to send this company down the road. Like way down the road.

Thank you,
