# Project Overview

# Descripción General del Proyecto

The City has received funding for the design of a two-lane roadway from the 180th St/Smokey Point Blvd intersection east to Airport Blvd. This project includes a multi-use trail on the north side and a roundabout at the intersection of 180th St/Airport Blvd. Design work began in early 2024 and the City will be reaching out to the community to solicit input and feedback on the design of this roadway. The 180th St. Connector project continues the City's goal to develop a multimodal transportation grid-network in the Smokey Point area.

### Project Benefits

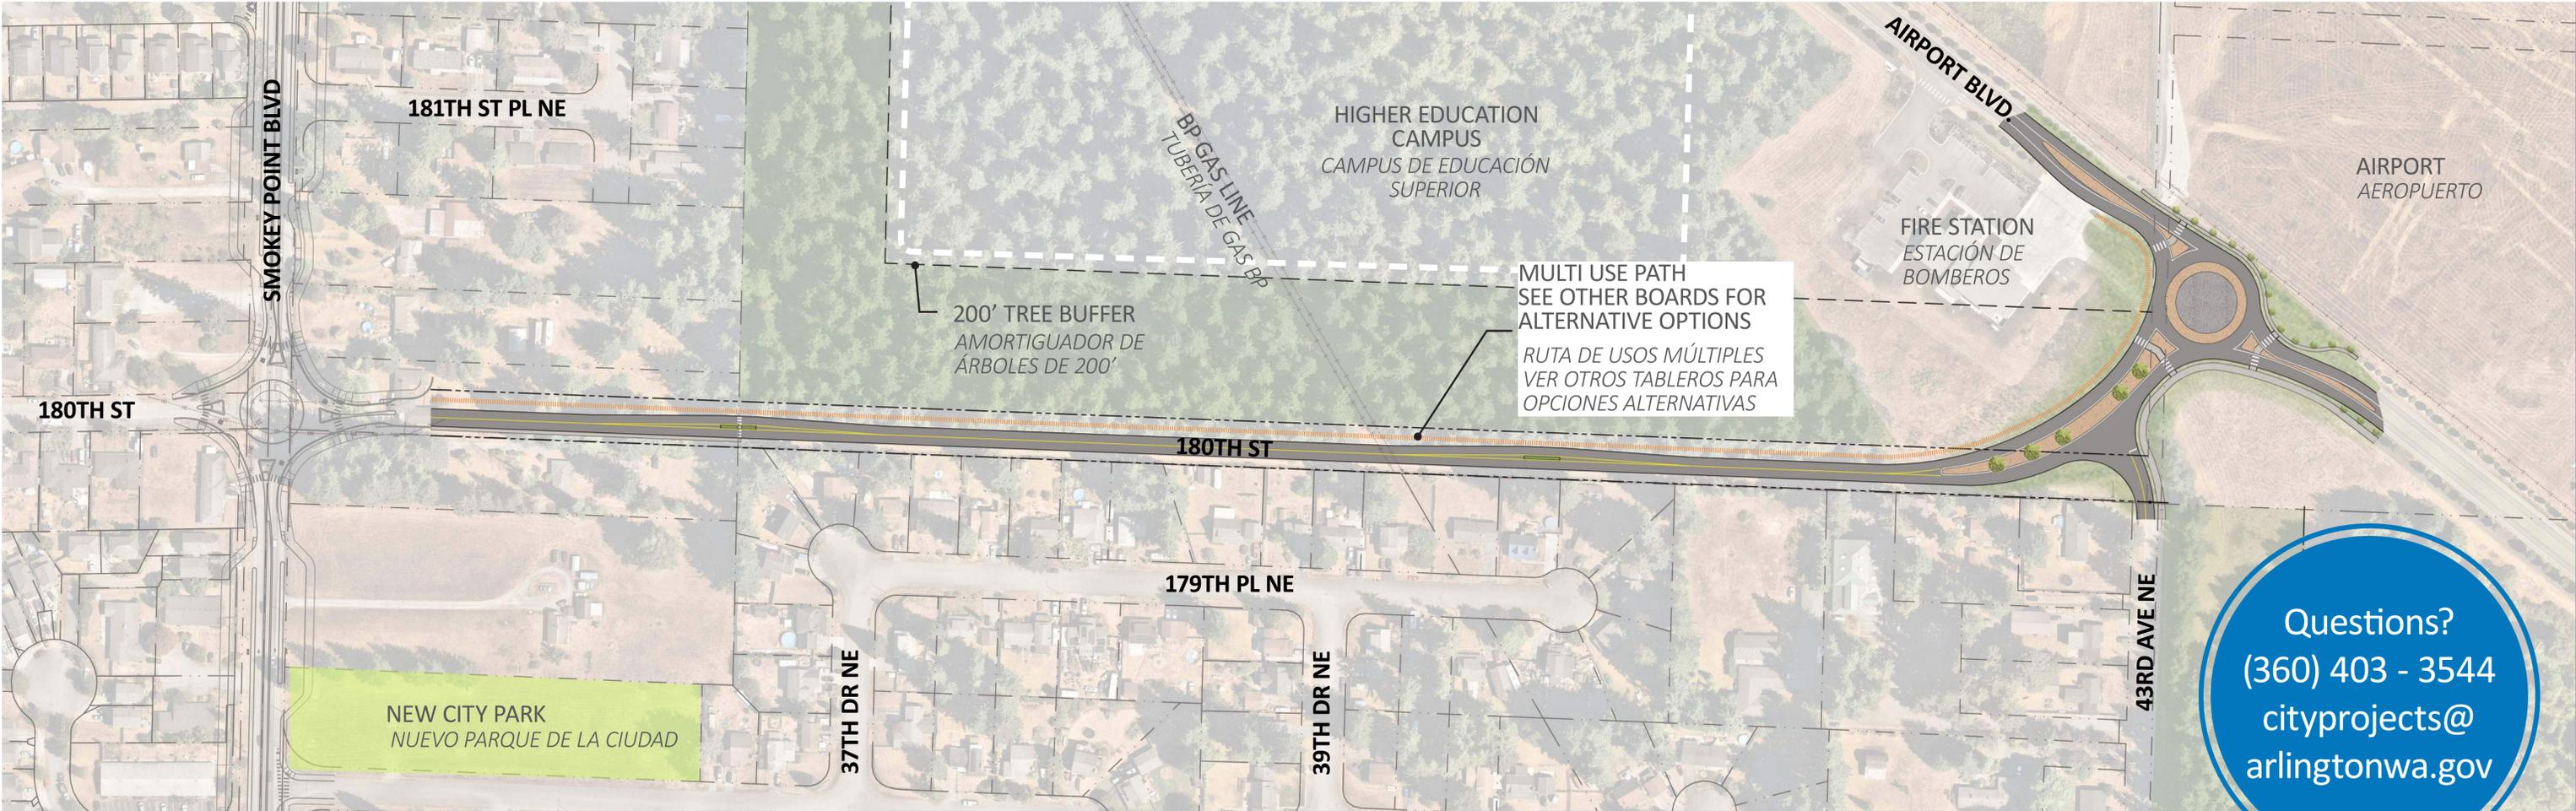

- Provide a Multi-Use Path connecting to the Airport Trail
- Improved Emergency Response Time
- Prevents cut-thru southbound traffic on 43rd
- 180th Street is part of a larger Cascade Industrial Center (CIC) master plan
- Project will support new development around Airport Boulevard
- Provides relief to other congested intersections
- Provides an alternative transportation route

### Resumen Del Proyecto

La Ciudad ha recibido fondos para el diseño de una carretera de dos carriles desde la intersección de 180th St/Smokey Point Blvd hacia el este de Airport Blvd. Este proyecto incluye un sendero de usos múltiples en el lado norte y una acera en el lado sur con una rotonda en la intersección de 180th St/Airport Blvd. La Ciudad se comunicará con la comunidad para solicitar opiniones y comentarios sobre el diseño de esta carretera. El trabajo de diseño comenzará a fines del otoño de 2024, el proyecto de conexión 180th St. continúa el objetivo de la ciudad de desarrollar una red de transporte multimodal en el área de Smokey Point.

### Beneficios del proyecto

- Proporcionar una ruta de usos múltiples que conecte con la ruta del aeropuerto
- Mayor tiempo de respuesta a emergencias
- Impide el tráfico en atajo hacia el sur en la calle 43
- 180th Street es parte de un plan maestro más grande del Cascade Industrial Center (CIC)
- El proyecto apoyará el nuevo desarrollo alrededor de Airport Boulevard
- Proporciona alivio a otros intereses congestionados
- Proporciona una ruta de transporte alternativa

# Survey Results

September 18, 2023

63 Survey Responses:

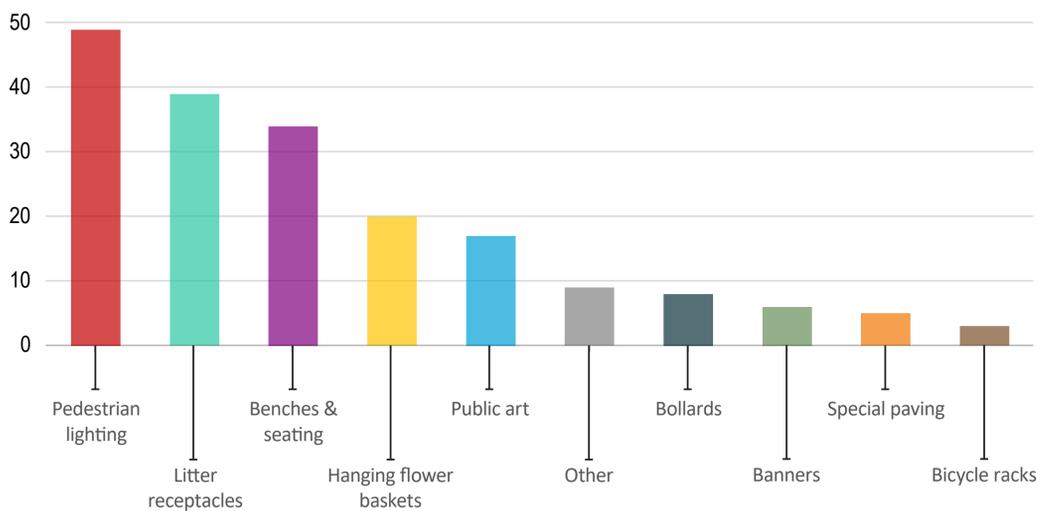

Rank (1-5) what features would make you feel safer when using 180th Street?:

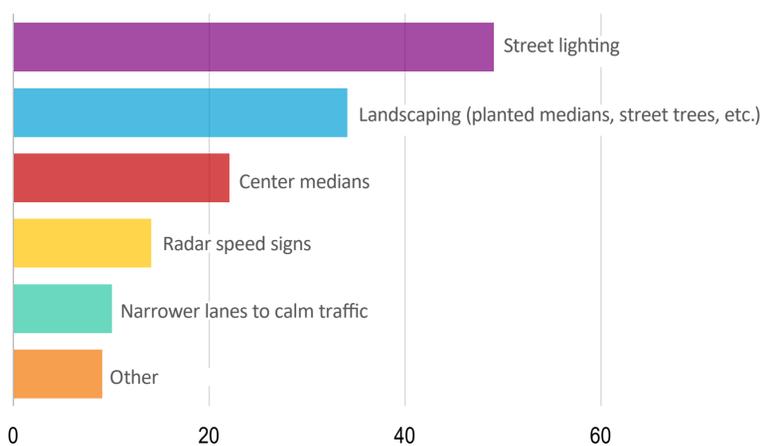

Comments from 1st Public Survey :

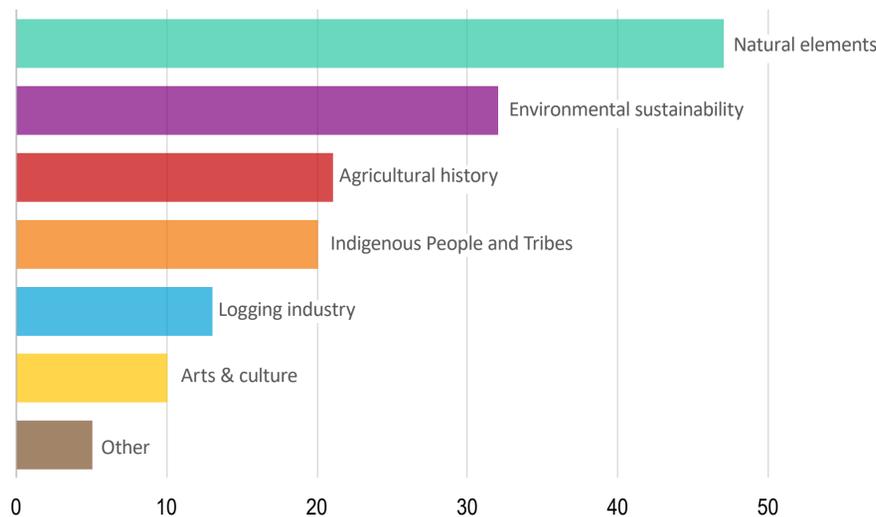

What pedestrian amenities are most important to you?

What roadway features are most important to you?

Thinking about the history and character of the area, what design elements should be included?

# Resultados de la Encuesta

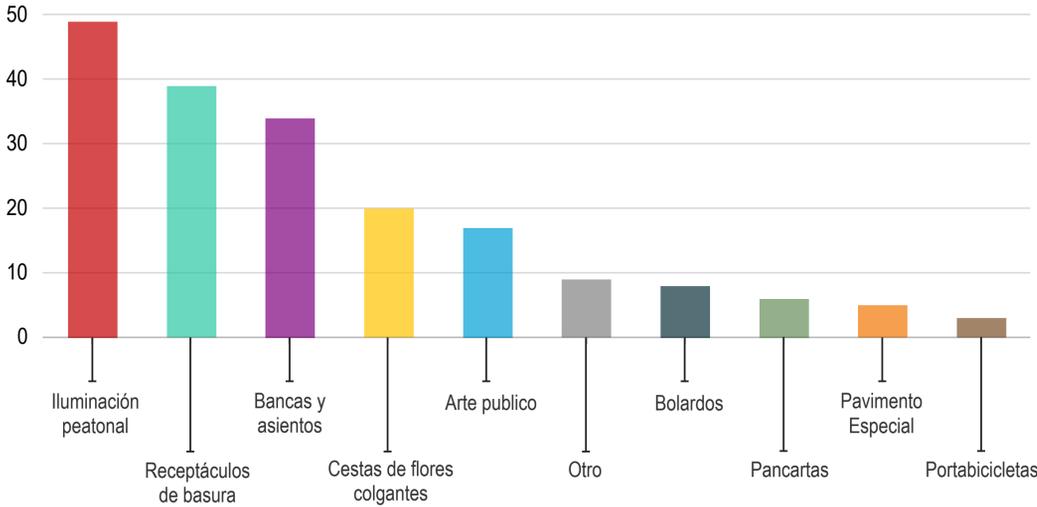

September 18, 2023

## 63 Respuestas a la Encuesta

Califique (1-5) ¿Qué características le harían sentir más seguro al usar la Calle 180?

¿Qué servicios para peatones son más importantes para usted?

## Comentarios de la primera encuesta pública:

Esta es una maravillosa adición para dirigir el tráfico en otras direcciones.

Mantengan una zona de buen tamaño para la vida silvestre!!!

Me encanta ver a Arlington abordar el creciente crecimiento de manera positiva.

Espero que el proyecto solucione los problemas de velocidad y que los niños estén más seguros :)

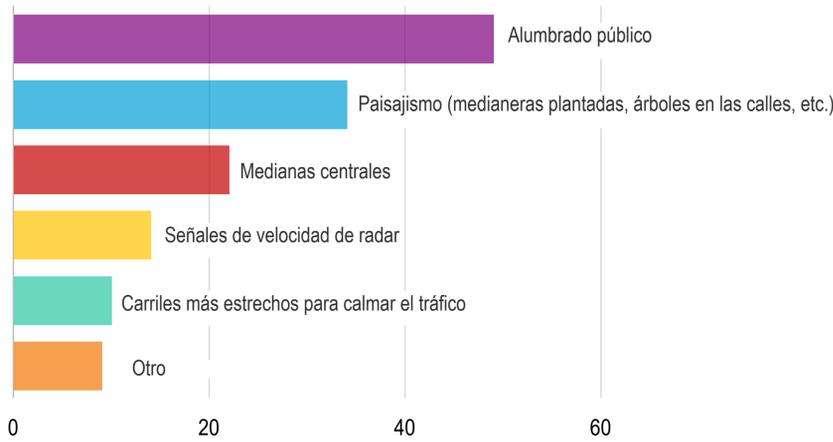

Las carreras callejeras, el consumo de drogas y vagancia ya son problemas en Airport Blvd!!!

Hay que hacer algo para aliviar el desorden de tráfico en Arlington.

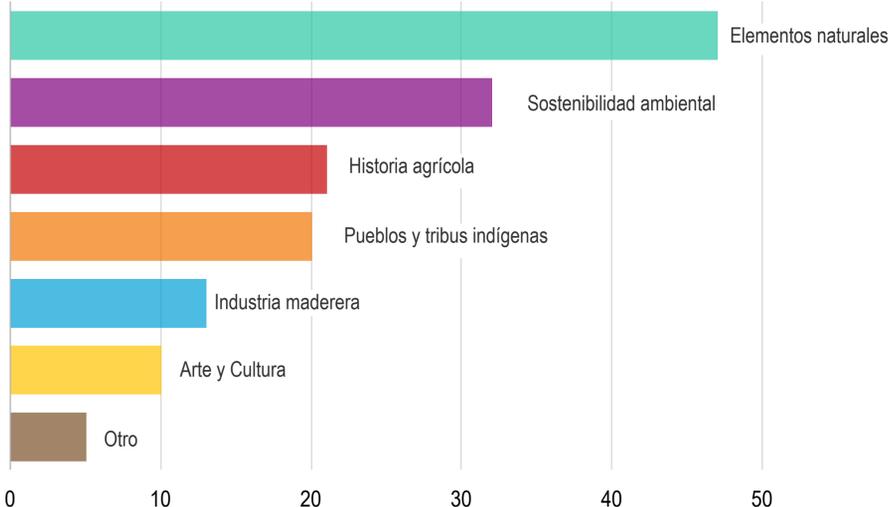

Vallas altas a lo largo de los patios traseros que discurren a lo largo de esta carretera.

Camino perfectamente recto. La velocidad será un problema.

¿Qué características de carretera son más importantes para usted?

Pensando en la historia y el carácter de la zona, ¿qué elementos de diseño deberían incluirse?
