

TRANSPORTATION SUPPORTING ANALYSIS

Book 6

Book 6: Transportation Supporting Analysis

Background information for the Transportation Book may be found in the document entitled “Transportation Master Plan”, set to be adopted in 2024, located in Appendix H. The Transportation Master Plan (TMP) includes existing conditions of roadways, public transportation, non-motorized facilities, air transportation, and freight transportation including truck routes and rail; projected future conditions as 2044; a transportation systems plan; a financing program and funding strategies to address project and program estimated costs; and a description of how the TMP is aligned with other agencies such as the Puget Sound Regional Council and the Washington State Department of Transportation. Two new recommendations of the TMP are for the City to adopt level of service standards for the non-motorized system and to implement a Adopt the Downtown Sidewalk program. The 2024 Arlington TMP is incorporated into the City of Arlington Comprehensive Plan by reference and therefore serves as the background report for the Transportation Book.
