1 INTRODUCTION

The Riley Group, Inc. (RGI) has performed this Phase I Environmental Site Assessment (ESA) for the Proposed Arlington Airport Business Park Development II property located between 51st Avenue Northeast and 43rd Avenue Northeast, Arlington, Snohomish County, Washington (hereafter referred to as the Property, Figure 1). Historical addresses of 17617, 17705, and 17708 49th Place are associated with the Property parcel number 31052100400100. However, these addresses are for an off-Property portion of the parcel.

The Property consists of approximately 30-acres of land (a portion of Snohomish County tax parcel number 31052100400100), and is undeveloped and vacant land. The owner of the Property is the City of Arlington.

The Phase I ESA was performed on behalf of SMARTCAP CRE Value Fund 3, LLC (hereafter referred to as the Client), which authorized the Phase I ESA on August 20, 2021. RGI understands the Client intends to purchase and develop the Property.

1.1 PURPOSE

This Phase I ESA was performed to identify recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs), and business environmental risks (BERs) associated with the Property in accordance with the scope of work and procedures included in the American Society for Testing and Materials Standard Practice E1527-13 (ASTM E1527-13) and the Code of Federal Regulations Title 40 Part 312 (40 CFR 312).

RECs, HRECS, CRECs, and BERs, as defined by ASTM E1527-13, are described below:

[The term “recognized environmental condition” means] the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment, 2) under conditions indicative of a release to the environment or 3) under conditions that indicate an existing release, a past release, or pose a material threat of a future release to the environment. The term is not intended to include “de minimis conditions” that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the applicable governmental agencies.

[The term “historical recognized environmental condition” means] a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

[The term “controlled recognized environmental condition” means] a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

[The term “business environmental risk” means] a risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

Other definitions used herein, as defined by ASTM E1527-13, are provided in Appendix B for reference.

This Phase I ESA was performed in compliance with the all appropriate inquiry (AAI) codified in 40 CFR 312. Completion of this Phase I ESA may qualify the Client for Landowner Liability Protections (LLP) from the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

1.2 SCOPE OF WORK

RGI's scope of work for this Phase I ESA included the following tasks:

- Review of state and federal databases of contaminated facilities and/or facilities that use hazardous materials in the vicinity of the Property.
- Submit the ASTM E1527-13 User Questionnaire to the Client and the owner of the Property and review any completed questionnaires.
- Review of building department records, health department records, fire department records, tax assessor records, city directories, historical aerial photographs, historical real estate and fire insurance plat maps, topographic maps, geologic maps, and water/resource protection well log records, where available and applicable.
- Review of an environmental lien search report and/or title report, if provided by the Client.
- Perform a reconnaissance of the Property and a cursory reconnaissance of adjoining properties.
- Comment on underground storage tanks (USTs), aboveground storage tanks (ASTs), polychlorinated biphenyls (PCBs), sumps, oil-water separators, hydraulic hoists, disposal pits, groundwater wells, drywells, septic tanks, drums or large chemical storage containers, hazardous materials, and other environmental conditions, as applicable.
- Interview knowledgeable persons regarding the Property and/or adjoining properties.
- Review of Washington State Department of Ecology (Ecology) and/or Pollution Liability Insurance Agency (PLIA) files for the Property and/or adjoining properties, where applicable, available, and reasonably ascertainable.
- Review of any previous environmental reports and/or documentation prepared by others for the Property and/or adjoining properties (as provided to RGI by the Client or obtained by RGI).
- Prepare a final Phase I ESA, presenting RGI's findings, conclusions, and recommendations.

2 DESCRIPTION OF THE PROPERTY

2.1 LOCATION

The Property is located on the United States Geologic Survey (USGS) Arlington East and Arlington West, Washington, 7.5-Minute Topographic Maps (Figure 1) at an elevation of approximately 125 to 126 feet above mean sea level.

The Property is located in the southeast quarter of Section 21 of Township 31 North, Range 5 East of the Willamette Meridian. The Snohomish County tax parcel number for the Property is 31052100400100.

2.2 CHARACTERISTICS

The Property and surrounding area are essentially flat.

Typical property use in the surrounding area is a mixture of undeveloped, industrial, and commercial properties.

2.3 GEOLOGY AND HYDROGEOLOGY

The USGS mapped the Property as outwash (unit Qg1o), which is described as primarily silt, sand, and gravel with some clay.

Groundwater flow direction beneath the Property is unknown. However, based on a review of regional topography, the inferred groundwater flow direction is towards the west. Well logs for the surrounding area (well logs for the Property, if available, are discussed in Section 6.6) indicate that depth to groundwater is approximately 7 to 9 feet below ground surface (bgs).

2.4 CURRENT USE OF THE PROPERTY

The Property is undeveloped and vacant land (Appendix A, Photograph 1). Details are further discussed in Section 4.1 of this report.

2.5 CURRENT USES OF ADJOINING PROPERTIES

Current uses of adjoining properties are summarized below:

North of the Property: Undeveloped land, and 51st Avenue Northeast with warehouses beyond (Photograph 2).

East of the Property: Undeveloped land, and 51st Avenue Northeast with warehouses beyond (Photographs 3 and 4).

South of the Property: Undeveloped land and Airport Trail with Weston High School, Stillaguamish Athletic Club, and industrial buildings under construction beyond (Photographs 5 through 7).

West of the Property: Airport Trail with 43rd Avenue Northeast and single-family residences beyond (Photograph 8).

The above adjoining properties are not likely to handle hazardous materials that could have an adverse effect on the Property.

3 PROVIDED INFORMATION

Previous environmental reports, related documentation, or other pertinent information provided by the Client or the owner of the Property are either described below or described elsewhere in this Phase I ESA (as indicated). Copies of the provided information are included in Appendix C.

3.1 ENVIRONMENTAL LIEN SEARCH

No environmental lien records search was provided to RGI for the purposes of this Phase I ESA.

3.2 TITLE REPORT

No title records were provided to RGI for the purposes of this Phase I ESA.

3.3 PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports were provided to RGI by the Client for the purposes of this Phase I ESA.

3.4 ASTM E1527-13 USER QUESTIONNAIRE

RGI provided an ASTM E1527-13 User Questionnaire to the Client, but has not received a completed questionnaire as of the date of this report.

4 RECONNAISSANCE

RGI performed a reconnaissance of the Property on September 7, 2021. Features of the Property and surrounding area observed during reconnaissance are illustrated on Figure 2. Photographs of the Property and adjoining properties are provided in Appendix A.

RGI was unaccompanied during the reconnaissance, but had access to all exterior areas of the Property. Weather conditions during reconnaissance were generally sunny.

4.1 OPERATIONS/PROCESSES

The Property is undeveloped land.

4.2 BUILDING INFORMATION

No buildings or structures are present on the Property.

4.3 OTHER OBSERVATIONS

Feature	Present on the Property? (Yes/No)	Further Discussed in Other Sections, as Noted Below (If Applicable)
Wells	No	
Sumps	No	
Stormwater catch basins	No	
Septic systems	No	
Oil-water separators	No	
Transformers	No	
Hoists	No	
USTs	No	
ASTs	No	
Suspect pavement patches	No	
Suspect floor drains	No	

Natural gas meter	No	
Surface water	No	
Fill or disturbed soils	Yes	Section 4.3.1
Hazardous materials	No	
Pesticides	No	
Drums or other large chemical storage containers	No	
Waste disposal	No	
Debris piles or dumping	Yes	Section 4.3.1
Adverse odors	No	
Staining	No	
Suspect stressed vegetation	No	

4.3.1 EXTERIOR OBSERVATIONS

RGI's exterior observation findings are illustrated on Figure 2 and are summarized below:

- The exterior areas of the Property primarily consisted of natural vegetation (Photograph 1).
- Some unpaved walking trails were observed on the Property with minor amounts of plastic and other trash. The trails appeared maintained.

In summary, based on our exterior observations during the reconnaissance, no staining, adverse odors, stressed vegetation, or any other indications of improper storage or release of hazardous substances or petroleum products was observed on the Property.

No suspect environmental conditions were observed on the adjoining properties (as viewed from the Property).

4.4 POLYCHLORINATED BIPHENYLS (PCBs) OBSERVATIONS

The Environmental Protection Agency (EPA) considers PCBs to be a possible human carcinogen. The Toxic Substance Control Act of 1976 prohibited any manufacturing of PCBs in the United States after January 1, 1979.

PCBs have historically been used in the manufacture of electrical or other hydraulic equipment (for example, transformers, elevators, trash compactors, hoists), building materials (caulking, insulation), and building fixtures (for example, light ballasts, light bulbs, thermostats). Under 40 CFR 761.3, the mineral oil contained in untested transformers is assumed to be "PCB-contaminated" (50 to 499 parts per million PCB). The continued use of this equipment is authorized by the EPA. Per ASTM E1527-13, this section does not evaluate light ballasts.

No indications of PCB-containing equipment or suspect electrical or hydraulic equipment were observed on the Property.

4.5 UNDERGROUND AND ABOVEGROUND STORAGE TANKS (USTS AND ASTS) OBSERVATIONS

RGI's UST and AST survey included a reconnaissance of the Property to identify indications of existing or former USTs or ASTs, such as vent pipes, fill pipes, product lines, concrete pads, or asphalt patches (see Section 6.2 for a discussion of municipal records).

No indications of existing or former USTs or ASTs were observed on the Property.

5 INTERVIEWS

RGI interviewed knowledgeable parties regarding the Property and its setting. Our interview findings are summarized below. Findings from the interview process may also be incorporated in other sections of this Phase I ESA.

5.1 CURRENT OWNER

Contact information for the current owners of the Property was not provided to RGI.

5.2 PREVIOUS OWNER(S)

Contact information for the previous owners of the Property was not provided to RGI.

6 GOVERNMENTAL REGULATORY AND MUNICIPAL RECORDS REVIEW

RGI's federal, state, and local governmental regulatory and municipal records review and discussion of findings are presented below.

6.1 FEDERAL AND STATE REGULATORY RECORDS SEARCH AND FILE REVIEW

RGI reviewed federal and state records in a search for properties with existing and/or potential environmental liabilities. Environmental Risk Information Services (ERIS) out of Ontario, Canada performed the records search on August 30, 2021. All records reviewed used search radii in accordance with ASTM E1527-13.

A copy of Database Report is included in Appendix D.

If the Property and/or adjoining properties were listed on any of the reviewed environmental regulatory databases, RGI requested to review their Washington State Department of Ecology (Ecology) files. Any available and reasonably ascertainable regulatory agency records are further discussed in Sections 6.1.1 and/or 6.1.2 below, as applicable. Select copies of the Ecology files are included in Appendix D.

6.1.1 THE PROPERTY

The Property was not listed on any of the environmental regulatory databases reviewed by ERIS. Therefore, a regulatory agency file review is not necessary at this time.

6.1.2 ADJOINING PROPERTIES

East-adjoining Morgan Aerospace LLC – 17713 48th Drive Northeast

The east-adjoining Morgan Aerospace LLC located at 17713 48th Drive Northeast (across 51st Avenue Northeast) is listed on the following databases reviewed by ERIS: ALLSITES, ERTS, and RCRA VSQG. See Appendix D for a list of database sources and definitions. The ALLSITES and RCRA

VSQG database listings are due to the property currently and historically handling hazardous waste associated with aerospace manufacturing. The type and quantity of waste is not specified. As of June 2021, there are no violation records associated with this facility. The ERTS listing is due to a suspected release via floor drains. However, a field visit determined that the floor drains lead to a 500-gallon storage tank, not a sewer, stormwater, or septic system. Given this information, and agency file review is not necessary. Based on the lack of any known or suspected contamination, these database listings do not indicate a risk to the Property soil, soil vapor, and groundwater quality.

East-adjointing Compressed Air Systems – 51st Avenue Northeast

The east-adjointing Compressed Air Systems located at 51st Avenue Northeast (across 51st Avenue Northeast) is listed on the following databases reviewed by ERIS: ERTS and SPILLS. These listings are due to a caller reporting that the company was unlicensed to work on air conditioning with a suspected flammable gas leaks to the air. Given this information, and agency file review is not necessary. Based on the media affected by the releases (air), lack of any known or suspected soil or groundwater contamination, these database listings do not indicate a risk to the Property soil, soil vapor, and groundwater quality.

South-adjointing Vacant Land

The south-adjointing vacant land is listed on the ALL SITES database (no address, only GPS coordinates). The listing is due to a water quality permit for construction purposes (likely for the industrial buildings under construction). Given this information, and agency file review is not necessary. Based on the lack of any known or suspected contamination, these database listings do not indicate a risk to the Property soil, soil vapor, and groundwater quality.

South-adjointing Arlington Airport Shotgun Range – 172nd St Northeast & 51st Ave Northeast

The south-adjointing Arlington Municipal Airport Shotgun Range located at 172nd St Northeast & 51st Ave Northeast is listed on the following databases reviewed by ERIS: ALLSITES, CSCSL NFA, and VCP. These listings are due to a former gun range that caused lead contamination in the soils. Records from Ecology indicate that the site contamination extended into the southern portion of the Property. However, remediation of the soils took place in 2006 with final confirmation soil sampling indicating a successful cleanup. Ecology issued a no further action (NFA) determination in 2007. Based on the historical contamination encroaching into the Property, the successful remediation, and property status (NFA), the historical lead contamination from the former gun range is considered a HREC.

South-adjointing Weston High School – 4407 172nd Street Northeast

The south-adjointing Weston High School (aka Arlington Airport Business Park) located at 4407 172nd Street Northeast is listed on the ALL SITES database reviewed by ERIS. The listing is due to a water quality permit for construction purposes. Given this information, and agency file review is not necessary. Based on the lack of any known or suspected contamination, these database listings do not indicate a risk to the Property soil, soil vapor, and groundwater quality.

6.1.3 OTHER PROPERTIES

Other properties within 1 mile of the Property were listed on various environmental regulatory databases. However, due to the nature of the database listings, media affected, contaminants of concern, property status, distance from the Property, and/or inferred groundwater flow direction relative to the Property, these other properties are not considered a risk to the soil, soil vapor, and/or groundwater quality of the Property.

6.1.4 KNOWN OR SUSPECT CONTAMINATED RELEASE SITES WITH POTENTIAL VAPOR MIGRATION

The ERIS report and additional databases were reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor to be migrating beneath the Property. Based on the ASTM E 2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, known or suspected contaminated sites located within 0.10 miles, for petroleum contaminants, or 0.33 miles for other contaminants of concern were evaluated for their potential to migrate beneath the Property. If contaminated soil vapors from an up-gradient, known, or suspect contaminated site are identified, online resources are reviewed to determine the extent of the contaminated plume at those sites, if possible. The following describes search distances for contaminated plumes of petroleum hydrocarbons and other contaminants of concern.

Based on our review of the Database Report information as indicated above, there no adjacent or up-gradient known, or suspect petroleum hydrocarbon impacted soil or groundwater plumes located within 0.10 miles of the Property.

Based on our review of the Database Report, there are no adjacent or up-gradient known or suspect contaminated soil or groundwater plumes located within 0.3 miles of the Property.

6.2 PETROLEUM LIABILITY INSURANCE AGENCY (PLIA) RECORDS

The Property was not listed on the PLIA database. However, PLIA records are searchable by address, and the Property does not have one.

6.3 UNDERGROUND AND ABOVEGROUND STORAGE TANKS (USTs/ASTs) RECORDS

RGI contacted the local fire and building departments regarding records of USTs and ASTs associated with the Property. However, a response was not received prior to the release of this report.

6.4 ENVIRONMENTAL COMPLAINTS AND HAZARDOUS MATERIAL RESPONSES

RGI contacted the Public Disclosure Coordinator for Ecology to determine whether any Environmental Report Tracking System (ERTS) listings exist for the Property. The ERTS database tracks all environmental reports and complaints made to Ecology since 1990, including clandestine drug labs and hazardous material responses. Ecology indicated, and sent records supporting, that the southern portion of the Property was remediated for historical lead contamination of the soils as part of the Arlington Municipal Gun Range site. See Section 6.1.2 of this report for details on the south-adjointing Arlington Municipal Gun Range.

RGI also contacted the local health department regarding any clandestine drug labs or hazardous material responses associated with the Property. No records were found.

6.5 DRINKING WATER WELLS AND SEPTIC SYSTEMS RECORDS

RGI contacted the local health and building departments regarding any existing or former septic systems or drinking water wells located on the Property. The health department had no records. A response form the building department was not received prior to the release of this report.

6.6 WELL AND SOIL BORING LOGS

RGI reviewed Ecology's Well Log Viewer online database. The database provides logs for wells and soil borings. No boring or well logs were found for the Property (other well logs are discussed in Section 2.3).

6.7 AREA-WIDE CONTAMINATION CONCERNS

No area-wide contamination issues have been identified for the Property.

7 HISTORICAL REVIEW

RGI's historical review of the Property and adjoining properties was based on an evaluation of the following:

- City directories dated 1980, 1990, 1995, 2000/01, 2006, 2009, 2012, 2016, and 2020.
- County tax assessor current and historical records.
- Historical aerial photographs (aerials) dated 1941, 1944, 1954, 1956, 1968, 1971, 1981, 1990, 2005, 2006, 2011, 2013, 2015, 2017, and 2019.
- Topographic maps (topos) dated 2017 and 2020.

In addition, RGI attempted to review fire insurance maps. However, no records were available for the Property according to ERIS.

The current and historical addresses, as applicable, identified during this Phase I ESA were used during the historical records search.

Select historical documentation is provided in Appendix E. RGI's historical research findings are discussed below.

7.1 THE PROPERTY

The only known development to the Property was in approximately 1945 when the back of the former south-adjointing gun range was constructed, which extended into the southern portion of the Property. The gun range was terminated in 1978. Records from Ecology indicate that the south-adjointing Arlington Municipal Gun Range site had lead contamination in soils which extended beneath the southern portion of the Property. However, remediation of the soils took place in 2006 with final confirmation soil sampling indicating a successful cleanup. Ecology issued a NFA determination for the Arlington Municipal Gun Range site in 2007. See Section 6.1.2 of this report for details on the Arlington Municipal Gun Range. The Property was observed to be occupied by undeveloped land during reconnaissance.

7.2 ADJOINING PROPERTIES

The historical uses of adjoining properties are summarized below.

7.2.1 NORTH OF THE PROPERTY

The only known development to the north-adjoining Property were two to three former residences constructed sometime before 1941 along the western side of the Property. The residences were demolished between 1944 and 1954, and has remained vacant and undeveloped since then. The property was observed to be undeveloped land during reconnaissance.

7.2.2 EAST OF THE PROPERTY (DIRECTLY ADJACENT AND ACROSS 51ST AVENUE NORTHEAST)

The directly east-adjoining property is undeveloped. The east-adjoining property across 51st Avenue Northeast was first developed sometime between 1944 and 1954 with the construction of two former unknown buildings. The unknown buildings were demolished sometime before 1981. The existing warehouses were constructed between 1990 and 2011. City directories indicate numerous aerospace businesses have occupied the warehouses since then. Undeveloped land was observed directly adjoining the Property, and warehouses were observed across 51st Avenue Northeast during reconnaissance.

7.2.3 SOUTH OF THE PROPERTY

The first known development to the south-adjoining property was two to three residential farms constructed sometime before 1941. The residences were demolished between 1941 and 1945. The former Arlington Municipal Gun Range was constructed in approximately 1945 and operated until 1978. The two existing commercial buildings were constructed between 1971 and 1981. The existing industrial buildings began to be constructed between 2020 and 2021. Weston High School, Stillaguamish Athletic Club, and industrial buildings under construction were observed during reconnaissance.

7.2.4 WEST OF THE PROPERTY

The west-adjoining property was first developed between 1944 and 1954 with two former residences across 43rd Avenue Northeast. The southern former residence was demolished between 1981 and 1990, and several of the existing residences were constructed in its place. The northern former residence was demolished between 1990 and 2005, and the remaining existing residences were constructed in its place. The existing Airport Trail was constructed at an unknown date. Residences across 43rd Avenue Northeast and Airport Trail were observed during reconnaissance.

8 DATA GAPS

8.1 DATA FAILURE

Data failure occurs when the information obtained from a review of the standard historical sources that are considered reasonably ascertainable still do not meet the objectives stated in ASTM E1527-13 Sections 8.3.1 through 8.3.2.2. Data failure is one type of data gap.

A data failure was encountered while conducting historical research for this Phase I ESA. The following data failure occurred:

- There has been several time periods since 1940 for which data could not be obtained at 5-year intervals. However, RGI does not consider this data failure to be a significant data gap given the historical use of the Property (undeveloped).

8.2 OTHER DATA GAPS

A data gap is a lack of, or inability to obtain, information required by ASTM E1527-13.

Data gaps were encountered during this Phase I ESA. The following data gaps occurred:

- RGI did not receive responses from the local fire or building departments. However, RGI does not consider this data gap to be a significant data gap given the current and historical use of the Property (undeveloped), and the availability of other record sources.
- Fire insurance maps are not available for the Property according to ERIS. However, RGI does not consider this data gap to be a significant data gap given the current and historical use of the Property (undeveloped), and the availability of other record sources.
- RGI did not receive completed ASTM User Questionnaires. However, RGI does not consider this data gap to be a significant data gap given the current and historical use of the Property (undeveloped), and the availability of other record sources.
- RGI was unable to interview knowledgeable parties regarding the Property. However, RGI does not consider this data gap to be a significant data gap given the current and historical use of the Property (undeveloped), and the availability of other record sources.

8.3 SIGNIFICANT DATA GAPS

Significant data gaps are data gaps that impact the conclusion of this Phase I ESA.

Significant data gaps were not encountered during this Phase I ESA.

9 FINDINGS AND CONCLUSIONS

RGI has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 and 40 CFR 312 for the Proposed Arlington Airport Business Park Development II property located between 51st Avenue Northeast & 43rd Avenue Northeast, Arlington, Snohomish County, Washington. Any exceptions to or deletions from ASTM E1527-13 are described in Section 8.

Based on our Phase I ESA findings, no evidence of HRECs according to ASTM E1527-13 were identified in connection with the Property or its setting, except the following:

- **Former Arlington Airport Shotgun Range Soil Remediation:** The south-adjointing property was a former gun range that caused lead contamination in the soils. Records from Ecology indicate that the site contamination extended onto the southern portion of the Property. However, remediation of the soils took place in 2006 with final confirmation soil sampling indicated a successful cleanup. Ecology issued a NFA determination for the Arlington Airport Shotgun Range site in 2007. Based on the historical contamination encroaching into the Property, the successful remediation, and property status (NFA), the historical lead contamination from the former gun range is considered a HREC.

Based on our Phase I ESA findings, no evidence of RECs, CRECs, or BERs according to ASTM E1527-13 were identified in connection with the Property or its setting.

10 RECOMMENDATIONS

No further investigation is recommended or warranted.

11 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Any questions regarding the work within this Phase I ESA, the presentation of the information, or the interpretation of the data are welcome and should be referred to the undersigned.

Sincerely,

THE RILEY GROUP, INC.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR §312.10. We have the specific qualifications, based on education, training, and experience, to assess a property of the nature, history, and setting of the Property. We have developed and performed AAI in conformance with the standards and practices set forth in 40 CFR 312.

Tait Russell, LG

Distribution: Mr. Robert Shipley, SMARTCAP CRE Value Fund 3, LLC (PDF)

12 RELIANCE

No reports or other information regarding the Property or its setting were provided to RGI other than those resources specifically mentioned herein. Reports relied upon by RGI are listed in Section 14 of this Phase I ESA.

This Phase I ESA should be considered effective on September 14, 2021. Based on the requirements of ASTM E1527-13, components of the Phase I ESA, including the reconnaissance, interviews, environmental database reviews, and environmental professional's declaration, will remain in effect for 180 days from the date of this report, for use by the Client and its authorized representatives only. If this Phase I ESA is transferred to any other user, additional information will be required from that user in order to maintain the viability of this Phase I ESA. No other party may rely on this Phase I ESA without specific written agreement. Remaining elements of the Phase I ESA remain effective until September 14, 2022.

13 ASSUMPTIONS AND LIMITATIONS

Assumptions and limitations for this Phase I ESA are provided below and are intended to help manage any risks associated with the use of this Phase I ESA.

13.1 ASSUMPTIONS

RGI has made the following significant assumptions while performing this Phase I ESA.

Groundwater

Detailed information regarding groundwater flow depth and direction beneath the Property was not available. Based on a review of available well logs and regional topography for the vicinity, RGI assumes that groundwater beneath the Property is as described in Section 2.3. If information regarding groundwater that contradicts this assumption becomes available, the conclusions of this Phase I ESA may be impacted.

Historical Information

In evaluating the Property, RGI has relied upon information from individuals and agencies noted in the Phase I ESA. RGI assumes that the information provided by these third-party sources is accurate, and has no reason to suspect otherwise. RGI makes no warranty or guarantee regarding the accuracy and completeness of these resources.

13.2 LIMITATIONS

This Phase I ESA is intended for specific application to the Property, for the exclusive use of the Client and its authorized representatives. This Phase I ESA was prepared in a manner consistent with the level of skill and care ordinarily exercised by members of the profession currently practicing in the same locality and time, and under similar conditions. This Phase I ESA is based upon information obtained by RGI personnel and upon the condition of the Property and surrounding properties on the date of reconnaissance, supplemented by reasonably ascertainable information and data obtained by RGI. No other warranty or guarantee is implied or intended.

Content of Interviews

RGI accepts no responsibility for any deficiency, misstatements, or inaccuracies contained in this Phase I ESA as a result of misstatements, omissions, and misrepresentations or fraudulent acts of interviewees. In addition, potentially important interviewees are often unavailable or cannot be located within a reasonable project time frame.

Conflict of Interest

RGI has no present or contemplated future ownership interest or financial interest in the real estate that is the subject of this Phase I ESA. RGI has no personal interest with the subject matter of this Phase I ESA or the parties involved, which would prevent an independent analysis of the environmental conditions of the Property.

Uncertainty

No Phase I ESA can eliminate all uncertainty regarding potential RECs for the Property. This Phase I ESA is intended to identify potential RECs under the scope of work defined in Section 1 at the time this Phase I ESA was performed.

Changes in Property Conditions

Certain changes in the condition of the Property, including natural events (such as floods, earthquakes, and landslides), passage of time, changes in property use, and changes in occupancy, may affect the conclusions of this Phase I ESA. RGI is available to prepare a proposal to evaluate any changes, if needed.

Environmental Regulations

The conclusions of this Phase I ESA are based on local, state, and federal regulations in effect at the time the Phase I ESA was completed. Changes to applicable local, state, or federal regulations following completion of the Phase I ESA may impact its conclusions. RGI is available to prepare a proposal to evaluate any changes, if needed.

Other Non-Scope Considerations

This Phase I ESA is not intended in any way to address possible concerns related to biological agents, mold, wetlands, ecological resources, endangered species, cultural and historic resources, radon gas, asbestos-containing materials (ACMs), lead-containing paint (LCP), or any other items not specifically identified in this Phase I ESA (which are not required to satisfy ASTM E1527-13).

15 QUALIFICATIONS

15.1 MEGAN E. POYSNICK, LG, SENIOR ENVIRONMENTAL MANAGER

Education

B.S. Geology, Western Washington University, Bellingham, Washington, 2007

Special Training, Licenses, and Certifications

24-hour Asbestos Hazard Emergency Response Act (AHERA)

40-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER)

Washington State Licensed Geologist (License No. 3155)

Radiation and Nuclear Gauge Safety Training Class (TROXLER)

Professional Experience

Ms. Poysnick is a senior level licensed geologist with experience providing environmental consulting services throughout the Pacific Northwest since 2007. She has managed a wide range of projects that include property due diligence assessments, environmental risk assessment, Phase I ESAs, subsurface investigations, vapor intrusion assessments, remedial investigations and conceptual site modeling, and cleanup services for contaminated properties. Her specialty is acting as a liaison between clients and regulatory entities. Her client relationships include state and local entities, utilities, non-profit organizations, private, commercial, and industrial clients.

Representative Project Experience

Various Banks and Lending Institutions: Performing Phase I ESAs and Phase II Environmental Site Assessments for numerous properties throughout the Northwest.

Gas Station/Dry Cleaner Facilities: Managed environmental/remedial issues at numerous gas station and/or dry cleaner sites. Implemented soil and groundwater remedial actions, vapor intrusion assessments, assisted UST and fuel system upgrades and closures, performed periodic groundwater monitoring, prepared technical reports and assisted clients with regulatory compliance and closure primarily pertaining to compliance with the MTCA, Ecology, and PLIA. Ms. Poysnick has successfully managed numerous sites through closure in the form of No Further Action (NFA) determinations from Ecology and/or PLIA.

Site Developers: Managed numerous redevelopment projects where soil and/or groundwater remediation was conducted in conjunction with site redevelopment activities. These projects utilized direct excavation and pump and treat systems to remediate impacts. Effectively managed redevelopment projects from initial site assessment through implementation of appropriate remedial action(s) through regulatory closure with NFA determinations from Ecology and/or PLIA.

15.2 TAIT S. RUSSELL, LG, PROJECT GEOLOGIST

Education

M.S., Earth and Space Sciences – Applied Geosciences, University of Washington, Seattle, Washington, 2016

B.S., Earth and Space Sciences – Environmental Option, University of Washington, Seattle, Washington, 2014

Field Geology: Conducted geologic mapping projects in Montana, focusing on areas of structural and geomorphic processes. Tested and treated stormwater for construction of an underground municipal stormwater overflow tank in Seattle, Washington.

Special Training and Certifications

24-hour Asbestos Hazard Emergency Response Act (AHERA, Certificate No. 1628424), 2017

4-hour Asbestos Hazard Emergency Response Act (AHERA) Refresher (Certificate No. ON-4644-10371-081621), 2021

40-hour Hazardous Waste Operations and Emergency Response (HAZWOPER, Certificate No. 1626755), 2017

8-hour Hazardous Waste Operations and Emergency Response (HAZWOPER) Refresher, 2021

Commercial Small Unmanned Aerial System (UAS) Remote Pilot, 2016 (Certificate No. 3919181)

First-Aid/CPR/AED (ID No. GY73WN), 2019

Washington State Licensed Geologist (License No. 20120244), 2020

Washington State Site Assessor (Certificate No. 8881249), 2020

Professional Experience

Mr. Russell is a Project Geologist at RGI with over 4 years of professional experience in the environmental field. He's worked with numerous projects involving the assessment, characterization, and remediation of contaminated soil and groundwater.

Representative Project Experience

Redmond Housing: Conducted an AFR of a single-family residence and surrounding properties to determine if an existing or historical heating oil underground storage tank (UST) has serviced the single-family residence or adjoining properties. Current and historical records were obtained, reviewed, and summarized in a report.

Seattle Housing: Conducted a due-diligence Phase I ESA of a single-family residence. Current and historical records were obtained, reviewed, and summarized in a report. A property reconnaissance was also done.

Shelton Gas Station: Conducted a due-diligence Phase I ESA of a gas station with a combined restaurant. Current and historical records were obtained, reviewed, and summarized in a report. A property reconnaissance was also done.

ASTM E1527-13 DEFINITIONS OF TERMS

activity and use limitations (AULs)

“[L]egal or physical restrictions or limitations on the use of, or access to [the Site] (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, ground water, and/or surface water on [the Site] (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.”

actual knowledge

“[T]he knowledge actually possessed by an individual who is a real person, rather than an entity.”

adjoining properties

“Any real property or properties the border of which is contiguous or partially contiguous with that of [the Site], or that would be contiguous or partially contiguous with that of [the Site] but for a street, road, or other public thoroughfare separating them.”

all appropriate inquiry (AAI)

“[T]hat inquiry constituting ‘all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice’ as defined in CERCLA 42 USC §9601 (35) (B), that will qualify a party to a commercial real estate transaction for the threshold criteria for satisfying the LLPs to CERCLA liability...”

asbestos-containing material (ACM)

Any material or product that contains more than one percent asbestos.

business environmental risks (BERs)

“[A] risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.”

controlled recognized environmental condition (CREC)

“A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

data gap

“[A] lack of or inability to obtain information required by [ASTM E1527-13] despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by [ASTM E1527-13],” including, but not limited to conducting reconnaissance (for example, an inability to perform a complete reconnaissance) and interviews (for example, an inability to interview owners or regulatory officials).

data failure

“[A] failure to achieve historical research objectives... despite good faith efforts.” A data failure is a type of data gap.

de minimus condition

“[A] condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.”

environmental professional

“[A] person meeting the education, training, and experience requirements as set forth in 40 CFR 312.10(b).”

good faith

“[T]he absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one’s obligations in the conduct or transaction concerned.”

hazardous substance

“A substance defined as a hazardous substance pursuant to CERCLA 42 USC §9601 (14), as interpreted by EPA regulations and the courts...”

historical recognized environmental condition (HREC)

“A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

landowner liability protections (LLPs)

“[L]andowner liability protections under CERCLA; these protections include the *bona fide* prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability.”

lead-based paint (LBP)

Paint with lead levels equal to or exceeding 1.0 milligram per square centimeter (mg/cm^2) or 0.5 percent by weight.

lead-containing paint (LCP)

Paint containing any detectable levels of lead.

practically reviewable

“[I]nformation that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to [the Site] without the need for extraordinary analysis of irrelevant data.”

reasonably ascertainable

“[I]nformation that is (1) publically available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.”

recognized environmental conditions (RECs)

“[T]he presence or likely presence of any hazardous substances or petroleum products in, on, or [the Site] 1) due to any release to the environment, 2: under conditions indicative of a release to the environment or 3) under conditions that indicate an existing release, a past release, or pose a material threat of a future release to the environment.”

significant data gap

A significant data gap affects the ability of an Environmental Professional to identify a REC, and therefore, effects the conclusions of a Phase I ESA.

underground storage tank (UST)

“[A]ny tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10 percent or more beneath the surface of the ground.”

user

“[T]he party seeking to use [ASTM E1527-13] to complete a [Phase I ESA] of [the Site]. A user may include, without limitation, a potential purchaser of [the Site], a potential tenant of [the Site].... The user has specific obligations for completing a successful application of [ASTM E1527-13]....”

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

 To: Sacayanan, Tamara L. (ECY) <TSAC461@ECY.WA.GOV>
 Subject: Entry for ERTS

I just received this ERTS via phone call from Jeff Hayes of EPA. The facility is Glasair Aviation, LLC. Their main office is located at 18530 59th Drive NE in Arlington. The complaint is specifically about the paint shop which is located at 17713 48th Drive NE in Arlington about 1.5 miles from the main office (on the other side of the Arlington Airport). The complaint alleges that paints, thinners, primers, etc are being dumped into the floor drains at the paint shop. The business owner is Dan Burwell, and the paint shop manager is Mike Vivarose. Mr. Hayes visited the business recently and spoke with both gentlemen mentioned in the previous sentence. He confirmed that the floor drains in the paint shop lead to a 500-gallon holding tank. He confirmed with the landlord, Hans Vanderhofen, that this tank does not discharge anywhere. He found no evidence of the complaint but referred to HWTR/ECY for follow-up regarding management of hazardous wastes, specifically from the paint shop and the holding tank as it seems to be used for waste storage. Please refer this to Lucie Kubasova. Thank you!

Follow up Comments

Follow up Comment:

ERTS Number 641503 - City of Arlington did a great job of responding to this incident. They did not need help from SPPR - they were only making a MS4 report to WQ.

Follow up Comment:

ERTS Number 641503 - Historic Investigator Contact Information - FirstName: DICK MiddleName: LastName: WALKER OrganizationName: SPILLS, PREVENTION, PREPAREDNESS AND RESPONSE WorkLocation: NWRO

Follow up Comment:

ERTS Number 641503 - 5/24 10:26 – Rachel received call from Bill Blake and Ken Clarke, City of Arlington, to report a fuel spill at the Arlington Airport. G3 notification under Phase II Municipal Stormwater Permit. They had tried to connect with ERTS, but were not able to speak with a person.

Incident description: Arlington FD responded to car fire call. Hose was apparent from car on fire to Community Transit bus. CT leases this parking lot area from the Airport. FD reported that fuel was on parking lot surface only.

Employees later reported fuel smell from catch basins. Arlington staff responded and placed pads and booms in CBs. CBs drain to on-site infiltration pond. No odor or sheen was observed at infiltration pond. Airport leases specify lessee responsible for managing on-site systems.

Some pads removed Friday 5/24 p.m. Arlington staff will contact Airport manager today (5/28) for updated information and follow up to confirm pads/booms removed and check condition of infiltration pond.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

[NPL](#)

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Jun 25, 2021

National Priority List - Proposed:

[PROPOSED NPL](#)

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Jun 25, 2021

Deleted NPL:

[DELETED NPL](#)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Jun 25, 2021

SEMS List 8R Active Site Inventory:

[SEMS](#)

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Mar 23, 2021

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: May 25, 2021

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands:

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System -

CERCLIS

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned:

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jun 14, 2021

RCRA non-CORRACTS TSD Facilities:

RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jun 14, 2021

RCRA Generator List:

RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jun 14, 2021

RCRA Small Quantity Generators List:

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jun 14, 2021

RCRA Very Small Quantity Generators List:

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jun 14, 2021

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jun 14, 2021

Federal Engineering Controls-ECs:

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System:

[LUCIS](#)

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System:

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

[ERNS](#)

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Aug 20, 2021

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

[FRP](#)

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations:

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property:

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: May 25, 2021

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Jun 28, 2021

State

Hazardous Sites List:

[HSL](#)

Washington State Department of Ecology (DEC) records of sites that have been assessed and ranked using the Washington Ranking Method (WARM score) - a number between 1 and 5, where a score of 1 represents the highest level of risk and 5 the lowest. Some factors that enter into site hazard ranking include: the amount and type of contaminants present; how easily contaminants could come into contact with people and the environment; and the level of public concern. This database is state equivalent NPL.

Government Publication Date: Apr 12, 2021

Confirmed and Suspected Contaminated Sites List:

CSCSL

Confirmed & Suspected Contaminated Sites List made available by the Washington State Department of Ecology (DEC). This database is state equivalent CERCLIS.

Government Publication Date: Apr 12, 2021

Delisted Confirmed and Suspected Contaminated Sites:

DELISTED SHWS

This database contains a list of Confirmed & Suspected Contaminated Sites that were removed from the Washington State Department of Ecology (DEC).

Government Publication Date: Apr 12, 2021

No Further Action Sites List:

CSCSL NFA

A list of sites previously on the Washington State Department of Ecology (DEC) Confirmed and Suspected Contaminated Sites List (CSCSL) that have received a No Further Action (NFA) determination.

Government Publication Date: Jun 28, 2021

Solid Waste Facility Database:

SWF/LF

List of permitted solid waste and landfill facilities made available by the Washington Department of Ecology (DEC).

Government Publication Date: Jul 21, 2021

Recycling Facilities:

RECYCLERS

The Washington State Department of Ecology maintains this database of recycling opportunities available in Washington State.

Government Publication Date: Sep 16, 2020

Solid Waste Tire Facilities:

WASTE TIRE

The Washington State Department of Ecology maintains this database of waste tire recycling opportunities available in Washington State.

Government Publication Date: Jun 9, 2020

Leaking Underground Storage Tank (LUST) List:

LUST

Leaking Underground Storage Tank (LUST) list made available by the Washington Department of Ecology (DEC) contains information about underground storage tank facilities that require cleanup and their cleanup history.

Government Publication Date: Jun 28, 2021

Petroleum Technical Assistance Program:

LUST PTAP

Under the State of Washington's cleanup law, qualifying petroleum contaminated sites can apply for the Pollution Liability Insurance Agency's (PLIA) Petroleum Technical Assistance Program (PTAP). Sites under the PTAP may be provided with informal advice and technical assistance on the requirements of the Model Toxics Control Act (MTCA), which is the state's cleanup law. PLIA also provides written opinions on independent remedial actions on qualifying petroleum cleanup sites: No Further Action (NFA), Further Action (FA), and Partial Sufficiency (PS).

Government Publication Date: Mar 9, 2021

UST Loan and Grant Program:

UST LOAN

List of sites that have applied to the Pollution Liability Insurance Agency's (PLIA) UST Loan and Grant Program. PLIA partners with the Washington State Department of Health (DOH) to provide loans or grants to owners or operators of underground storage tank (UST) facilities, who wish to: upgrade/replace infrastructure, clean up contamination, or close a UST. Within the program, PLIA provides oversight and technical assistance, while the DOH operates the lending/repayment process.

Government Publication Date: Mar 9, 2021

Heating Oil Technical Assistance Program:

LST HOT

Within the Pollution Liability Insurance Agency's (PLIA) various programs, the Heating Oil Technical Assistance Program (HOTAP) provides assistance to owners and operators of active and abandoned heating oil tanks if there is a suspected release or contamination. PLIA provides services including: written opinions, observations of testing, site assessments, and reviews of the results of reports and other appropriate activities. Information in some records has been redacted by the Pollution Liability Insurance Agency under Washington State Legislature RCW 70.149.080.

Government Publication Date: Mar 9, 2021

Underground Storage Tanks:

UST

List of Underground Storage Tanks (USTs) made available by Washington Department of Ecology (DEC). The DEC regulates tanks at facilities including gas stations, industries, commercial properties and governmental entities. The DEC works to ensure these tanks are installed, managed, and monitored in a manner that prevents releases into the environment.

Government Publication Date: Jun 28, 2021

Delisted Leaking Storage Tanks:

DELISTED LST

List of leaking storage tanks made available by the Washington Department of Ecology (DEC). A record would be removed if it violated the Facility Oil Handling Standards. This list contains all the records that been removed from the storage tank list.

Government Publication Date: Jun 28, 2021

Aboveground Storage Tanks:

AST

List of aboveground storage tanks (ASTs) made available by the Washington Department of Ecology (DEC). This list includes many of the largest petroleum containing ASTs in Washington state, but there are many ASTs in many different types of services (including, for example, hydrocarbon storage), that are not subject to regulation and are not registered by the DEC. There is no inclusive AST regulation in Washington state, and the Department of Ecology ceased maintenance of this list in December 2015.

Government Publication Date: Dec 14, 2015

Spills Program Regulated Facilities:

AST SPL PREV

List of Class 1, 2, 3, and 4 regulated facilities. The Washington Department of Ecology regulates the equipment and oil transfer, storage, and handling at facilities to ensure environmental and public health. Depending on their classification (Class 1 Large facilities such as refineries, refueling terminals, and pipelines; Class 2 and Class 3 facilities that transfer oil; and Class 4 Marinas and other facilities that transfer oil to non-recreation vessels with a fuel capacity of less than 10,500 gallons), these facilities are required to have some type of spill prevention plan.

Government Publication Date: Feb 25, 2021

Delisted Storage Tanks:

DELISTED TNK

List of aboveground storage tanks made available by the Washington Department of Ecology (DEC). A record would be removed if it violated the Facility Oil Handling Standards. This list contains all the records that been removed from the storage tank list.

Government Publication Date: Jun 28, 2021

Environmental Covenants Institutional Controls:

INST

List of sites that have institutional controls or environmental covenants (64.70 RCW Uniform Environmental Covenants Act) made available by the State of Washington Department of Ecology. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as 'deed restrictions'), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property.

Government Publication Date: Apr 12, 2021

Voluntary Cleanup Program:

VCP

List of sites under the Voluntary Cleanup Program (VCP) made available by the Washington Department of Ecology (DEC). The VCP is an option for cleaning up hazardous waste sites under the state's cleanup law.

Government Publication Date: Jun 28, 2021

Brownfields Program:

BROWNFIELDS

List of Brownfields sites made available by the Washington Department of Ecology (DEC). Brownfield sites are abandoned or underused properties where potential liability due to environmental contamination and cleanup costs complicate re-development efforts.

Government Publication Date: Jun 28, 2021

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 10, which includes Washington.

Government Publication Date: Apr 14, 2020

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

USTs on Tribal/Indian Lands in Region 10, which includes Washington.

Government Publication Date: Apr 14, 2020

Delisted Tribal Leaking Storage Tanks:

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks:

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

County

Snohomish County Solid Waste Sites of Record:

SNO SWF/LF

The Solid Waste and Toxics (SWT) Program in the Snohomish Health District inspects or monitors a number of solid waste disposal or utilization sites and maintains a list of known solid waste sites in Snohomish County.

Government Publication Date: Apr 27, 2020

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites:

PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2021

Facility Registry Service/Facility Index:

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act:

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Jun 25, 2021

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jun 14, 2021

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

Former Military Nike Missile Sites:

[FORMER NIKE](#)

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

[PIPELINE INCIDENT](#)

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System:

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites:

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations:

ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jul 12, 2021

Registered Pesticide Establishments:

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Apr 13, 2021

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Spills Incidents Sites:

SPILLS

List of spills and/or releases reported to the Washington Department of Ecology (DEC).

Government Publication Date: May 10, 2021

Reported Spills to Water:

SPILLS WATER

A list of reported spills to water of one gallon or more made available by the Washington Department of Ecology.

Government Publication Date: Feb 25, 2021

Facility/Site Identification System:

ALL SITES

The Facility/Site Identification System made available by the Department of Ecology (DEC) provides a central repository of key information for each facility/site of interest to DEC. The DEC has defined a facility/site as an operation at a fixed location that is of interest to the agency because it has an active or potential impact upon the environment.

Government Publication Date: Jul 5, 2021

Environmental Report Tracking System (ERTS):

ERTS

A list of incidents from the Environmental Report Tracking System (ERTS), used by various programs within the Washington Department of Ecology (DEC) to track incidents and activities. This list is made available by the Washington Department of Ecology (DEC).

Government Publication Date: May 20, 2021

Independent Cleanup Reports:

ICR

List of facilities in remedial action reports received by the Washington Department of Ecology (DEC) from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree. Independent Cleanup is historical terminology for Voluntary Cleanup; this data is no longer updated, current records can be found in Voluntary Cleanup.

Government Publication Date: Nov 6, 2015

Registered Drycleaners List:

[DRYCLEANERS](#)

A listing of registered drycleaner facilities maintained by the Department of Ecology.

Government Publication Date: May 26, 2021

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites which once appeared on the list of registered drycleaner facilities made available by the Department of Ecology.

Government Publication Date: May 26, 2021

Tier 2 Report:

[TIER 2](#)

List of facilities that report storage of hazardous chemicals or materials to the Department of Ecology's Hazardous Waste and Toxics Reduction Program under the Emergency Planning and Community Right to Know Act (EPCRA).

Government Publication Date: Jul 9, 2020

Clandestine Drug Lab Sites:

[CDL](#)

A list of Clandestine Drug Lab sites made available by the Washington Department of Health.

Government Publication Date: Mar 18, 2020

Clandestine Drug Lab Sites - Historical Listing:

[HIST CDL](#)

List of Clandestine Drug Lab sites reported to the Department of Health from local health departments. This list contains sites that are not in the current list.

Government Publication Date: until 2007

Air Permitted Facilities:

[AIR PERMITS](#)

This list of air emissions inventory is a point source summary of individual inventories from facilities with air operating permits. This list is maintained by the Washington Department of Ecology.

Government Publication Date: Jun 10, 2019

Underground Injection Control Wells:

[UIC](#)

The Water Quality Program of the Washington State Department of Ecology (DEC) maintains this water quality permit database that includes Underground Injection Control (UIC) wells. According to the DEC, UIC wells are manmade structures used to discharge fluids into the subsurface. Examples are drywells, infiltration trenches with perforated pipe, and any structure deeper than the widest surface dimension. The majority of UIC wells in Washington are used to manage storm water and sanitary waste, return water to the ground, and help clean up contaminated sites. The potential for groundwater contamination from injection wells depends upon well construction and location; quality of the fluids injected; and the geographic and hydrologic settings in which the injection occurs.

Government Publication Date: Oct 15, 2020

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Database Sources and Definitions

California Environmental Reporting System (CERS) Hazardous Waste Sites (CERS HAZ)

SOURCE DESCRIPTION List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

California Environmental Reporting System (CERS) Tanks (CERS TANK)

SOURCE DESCRIPTION List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

CERCLIS - No Further Remedial Action Planned (CERCLIS NFRAP)

SOURCE DESCRIPTION An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

SOURCE DESCRIPTION Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Confirmed and Suspected Contaminated Sites List (CSCSL)

SOURCE DESCRIPTION Confirmed & Suspected Contaminated Sites List made available by the Washington State Department of Ecology (DEC). This database is state equivalent CERCLIS.

Drycleaner Facilities (FED DRYCLEANERS)

SOURCE DESCRIPTION A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Environmental Report Tracking System (ERTS)

SOURCE DESCRIPTION A list of incidents from the Environmental Report Tracking System (ERTS), used by various programs within the Washington Department of Ecology (DEC) to track incidents and activities. This list is made available by the Washington Department of Ecology (DEC).

Emergency Response Notification System (ERNS)

SOURCE DESCRIPTION Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Facility Registry Service/Facility Index (FINDS/FRS)

SOURCE DESCRIPTION The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Facility/Site Identification System (ALL SITES)

SOURCE DESCRIPTION The Facility/Site Identification System made available by the Department of Ecology (DEC) provides a central repository of key information for each facility/site of interest to DEC. The DEC has defined a facility/site as an operation at a fixed location that is of interest to the agency because it has an active or potential impact upon the environment.

Hazardous Materials Information Reporting System (HMIRS)

SOURCE DESCRIPTION US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Hazardous Sites List (HSL)

SOURCE DESCRIPTION Washington State Department of Ecology (DEC) records of sites that have been assessed and ranked using the Washington Ranking Method (WARM score) - a number between 1 and 5, where a score of 1 represents the highest level of risk and 5 the lowest. Some factors that enter into site hazard ranking include: the amount and type of contaminants present; how easily contaminants could come into contact with people and the environment; and the level of public concern. This database is state equivalent NPL.

Hazardous Waste Manifest Data (HAZNET)

SOURCE DESCRIPTION A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Historical Hazardous Waste Manifest Data (HIST MANIFEST)

SOURCE DESCRIPTION A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Independent Cleanup Reports (ICR)

SOURCE DESCRIPTION List of facilities in remedial action reports received by the Washington Department of Ecology (DEC) from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

Integrated Compliance Information System (ICIS)

SOURCE DESCRIPTION The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include

Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Leaking Underground Storage Tank List (LUST)

SOURCE DESCRIPTION Leaking Underground Storage Tank (LUST) list made available by the Washington Department of Ecology (DEC) contains information about underground storage tank facilities that require cleanup and their cleanup history.

No Further Action Sites List (CSCSL NFA)

SOURCE DESCRIPTION A list of sites previously on the Washington State Department of Ecology (DEC) Confirmed and Suspected Contaminated Sites List (CSCSL) that have received a No Further Action (NFA) determination.

Petroleum Technical Assistance Program (LUST PTAP)

SOURCE DESCRIPTION Under the State of Washington's cleanup law, qualifying petroleum contaminated sites can apply for the Pollution Liability Insurance Agency's (PLIA) Petroleum Technical Assistance Program (PTAP). Sites under the PTAP may be provided with informal advice and technical assistance on the requirements of the Model Toxics Control Act (MTCA), which is the state's cleanup law. PLIA also provides written opinions on independent remedial actions on qualifying petroleum cleanup sites: No Further Action (NFA), Further Action (FA), and Partial Sufficiency (PS).

RCRA Non-Generators (RCRA NON GEN)

SOURCE DESCRIPTION RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

RCRA Small Quantity Generators List (RCRA SQG)

SOURCE DESCRIPTION RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create

hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Registered Drycleaners List (DRYCLEANERS)

SOURCE DESCRIPTION A listing of registered drycleaner facilities maintained by the Department of Ecology.

Shasta County - CUPA Facility List (CUPA SHASTA)

SOURCE DESCRIPTION A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Shasta County. This list is made available by Shasta County Environmental Health Division which has been designated as the CUPA for Shasta County by CalEPA.

SEMS List 8R Archive Sites (SEMS ARCHIVE)

SOURCE DESCRIPTION The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Snohomish County Solid Waste Sites of Record (SNO SWF/LF)

SOURCE DESCRIPTION The Solid Waste and Toxics (SWT) Program in the Snohomish Health District inspects or monitors a number of solid waste disposal or utilization sites and maintains a list of known solid waste sites in Snohomish County.

Spills Incidents Sites (SPILLS)

SOURCE DESCRIPTION List of spills and/or releases reported to the Washington Department of Ecology (DEC).

Tier 2 Report (TIER 2)

SOURCE DESCRIPTION List of facilities that report storage of hazardous chemicals or materials to the Department of Ecology's Hazardous Waste and Toxics Reduction Program under the Emergency Planning and Community Right to Know Act (EPCRA).

Underground Storage Tanks (UST)

SOURCE DESCRIPTION List of Underground Storage Tanks (USTs) made available by Washington Department of Ecology (DEC). The DEC regulates tanks at facilities including gas stations, industries, commercial properties and governmental entities. The DEC works to ensure these tanks are installed, managed, and monitored in a manner that prevents releases into the environment.

Voluntary Cleanup Program (VCP)

SOURCE DESCRIPTION List of sites under the Voluntary Cleanup Program (VCP) made available by the Washington Department of Ecology (DEC). The VCP is an option for cleaning up hazardous waste sites under the state's cleanup law.

To: Tait Russell
Subject: NWRO RESPONSE P007184

Hi Tait,

Thank you for your patience. I have uploaded all responsive documents that were located at the Northwest Regional Office that you requested in regards to **the undeveloped land between 51st and 43rd Aves NE, Arlington, WA** to the Public Records Request Center, and they should now be available to download. The old airport shotgun range was more towards 172nd but if I recall there were lead contaminated soils remediated on the far southern end of the wooded undeveloped portion.

If you have any questions, please do not hesitate to ask.

I will consider this request completed and closed for NWRO.

Respectfully,

Michael Hart

RE: Independent Remedial Action Grant Agreement No. G0800339
Former Shotgun Range Site

Dear Mr. Putnam:

Enclosed is your copy of the executed grant agreement providing up to \$200,000 in matching grant funds for the independent cleanup of the Former Shotgun Range site located at 172nd Street NE and 51st Avenue NE (Facility Site Number 8471567).

Your previously submitted reimbursement request will be reviewed for eligibility and processed. You should receive payment within approximately three weeks.

Please contact me at (360) 407-6062, if you have any questions.

Sincerely,

Diane R. Singer

Ecology - SWFA

REMEDIAL ACTION GRANT AGREEMENT
BETWEEN THE
STATE OF WASHINGTON DEPARTMENT OF ECOLOGY
AND
THE CITY OF ARLINGTON

This is a binding agreement entered into by and between the state of Washington Department of Ecology, hereinafter referred to as the DEPARTMENT, and the City of Arlington, hereinafter referred to as the RECIPIENT, to carry out the activities described herein.

RECIPIENT ADDRESS	Arlington Municipal Airport 18204 59 th Drive NE Arlington, WA 98223
RECIPIENT REPRESENTATIVE	Robert Putnam, Airport Manager
RECIPIENT TELEPHONE NUMBER	(360) 403-3470
RECIPIENT PROJECT COORDINATOR	Robert Putnam
DEPARTMENT GRANT MANAGER	Diane R. Singer, (360) 407-6062
DEPARTMENT FAX	(360) 407-6102
DEPARTMENT TECHNICAL STAFF	Norman Peck (425) 649-7047
FUNDING SOURCE	Local Toxics Control Account
MAXIMUM ELIGIBLE COST	\$400,000
STATE GRANT SHARE	\$200,000
LOCAL SHARE	\$200,000
STATE MAXIMUM GRANT PERCENT	50%
FEDERAL TAX IDENTIFICATION NO.	91-6001401

The effective date of this grant agreement is March 1, 2006. Any work performed prior to the effective date of this agreement without prior written authorization and specified in the Scope of Work will be at the sole expense and risk of the RECIPIENT.

This agreement shall expire no later than February 28, 2008.

PROJECT DESCRIPTION

The former shotgun range site is north of 172nd Street Northeast and approximately 1 mile east of Interstate 5 in Arlington, Washington. The site was purchased by the U.S. Navy in 1941. The Navy owned and operated the airport and surrounding site property until the City assumed possession in 1959. The site operated as a shooting range from 1945 through 1978 and has remained unoccupied since closure.

Shaw Environmental, Inc. (Shaw) was contracted by the City in May 2001 to assist the City in developing and implementing a plan to remediate lead and carcinogenic polycyclic aromatic hydrocarbon (cPAH) impacted soil at the former shooting range. Based on the results of investigations performed at the site, which delineated the extent of the lead and cPAH impacted soils above regulatory cleanup levels, a feasibility study was conducted for various remedial alternatives at the site. The study results identified on-site treatment of lead-impacted soil with cement kiln dust (CKD) and off-site disposal of cPAH impacted soil and the treated lead impacted soils as the preferred remedial option.

A cleanup action plan (CAP) was prepared in 2005 in accordance with the Model Toxics Control Act cleanup regulations.

The City contracted with Strider Construction Company, Inc. to perform voluntary cleanup activities on the site between March and September 2006. The remedial action included the successful treatment of lead impacted soils with cement kiln dust; excavation, transportation, and off site disposal of the lead and cPAH impacted soils from the site; and sampling confirming that remaining soil concentrations were below the Model Toxics Control Act Method A soil cleanup levels for unrestricted land use.

In December 2006, the City applied for a "No Further Action Determination" under WAC 173-340-515(5), which was granted by the Department of Ecology Northwest Regional Office on November 13, 2007. Based on review of the independent remedial action report, the Department of Ecology determined that the remedial actions conducted at the site were sufficient to meet the requirement contained in the Model Toxics Control Act for characterizing and addressing the contamination at the site and that no further action was necessary.

This grant will cover the costs associated with the independent remediation activities performed at the Arlington Municipal Airport Shotgun Range (Site No. 8471567) site that meet the eligibility requirements of the Remedial Action Grant Program Guidelines (Ecology Publication #07-07-032 October 2007) and the Administrative Requirements for Ecology Grants and Loans (Ecology Publication # 91-18 Revised September 2005). Overhead costs are limited to 25 percent of the salaries and benefits applied directly to the project (see Additional Budget Conditions). Documentation of all costs incurred will be required.

If the RECIPIENT successfully pursues a future private right of action against a potentially liable person, then the local government shall reimburse the DEPARTMENT for a proportionate share of the money received.

SCOPE OF WORK

The task(s) set forth below summarize the RECIPIENT's activities, budget(s), and schedule(s).

1. PROJECT TASK: INDEPENDENT CLEANUP ACTION

Maximum Eligible Cost: \$400,000

Schedule: March 1, 2006 to February 28, 2008

Project Description:

- a. Select contractor(s) and environmental consultant(s)
- b. Conduct detailed site assessment
- c. Conduct laboratory report/sampling/analysis
- d. Complete soil excavation and disposal
- e. Remove and dispose of contaminated vegetation
- f. Demolition of shooting bunkers
- g. Site restoration
- h. Prepare remedial action report and supporting documentation
- i. Manage and administer project

BUDGET

<u>Project Task</u>	<u>Maximum Eligible Cost</u>
1. Independent Cleanup Action	\$400,000
TOTAL	\$400,000

FUND SOURCE

Total Eligible Project Cost		\$400,000
Fund	Fund Share (%)	Maximum Fund Amount
Local Toxics Control Account	50%	\$200,000
Match Requirement	Match Share (%)	Match Amount
Cash Match	50%	\$200,000

ADDITIONAL BUDGET CONDITIONS

1. Overhead is eligible; the RECIPIENT may charge 25 percent of the RECIPIENT salaries and benefits applied directly to the project as overhead.
2. The fiscal office will monitor expenditure at the task level. A letter amendment is required to redistribute costs among tasks. A formal amendment is required to increase state funding.

3. The maximum allowable amount from LTCA is \$200,000. Cash match will pay all remaining costs.
4. All cost must have supporting documentation.
5. The RECIPIENT contact and telephone number for billing/invoice questions is Robert Putnam, Airport Manager, at (360) 403-3470.
6. The RECIPIENT payments from the DEPARTMENT shall be made payable to the City of Arlington, Municipal Airport, 18204 59th Drive NE, Arlington, WA 98223.

SPECIAL TERMS AND CONDITIONS

A. MINORITY AND WOMEN'S BUSINESS PARTICIPATION

The RECIPIENT agrees to solicit and recruit, to the maximum extent possible, certified minority-owned (MBE) and women-owned (WBE) businesses in purchases and contracts initiated after the date of this Agreement.

In the absence of more stringent goals established by the RECIPIENT's jurisdiction, the RECIPIENT agrees to utilize the DEPARTMENT'S goals for minority- and women-owned business participation in all bid packages, request for proposals, and purchase orders. These goals are expressed as a percentage of the total dollars available for the purchase or contract and are as follows:

Construction/Public Works	10% MBE	6%WBE
Architecture/Engineering	10% MBE	6%WBE
Purchased Goods	8% MBE	4%WBE
Purchased Services	10% MBE	4%WBE
Professional Services	10% MBE	4%WBE

Meeting these goals is voluntary and no contract award or rejection shall be made based on achievement or non-achievement of the goals. Achievement of the goals is encouraged, however, and the RECIPIENT and ALL prospective bidders or persons submitting qualifications shall take the following affirmative steps in any procurement initiated after the date of this Agreement:

1. Include qualified minority and women's businesses on solicitation lists.
2. Assure that qualified minority and women's businesses are solicited whenever they are potential sources of services or supplies.
3. Divide the total requirements, when economically feasible, into smaller tasks or quantities, to permit maximum participation by qualified minority and women's businesses.
4. Establish delivery schedules, where work requirements permit, which will encourage participation of qualified minority and women's businesses.
5. Use the services and assistance of the State Office of Minority and Women's Business Enterprises (OMWBE) and the Office of Minority Business Enterprises of the U.S. Department of Commerce, as appropriate.

By signing this Agreement, the RECIPIENT certifies that the above steps will be followed in any procurement initiated after the date of this Agreement. Any contractor engaged by the RECIPIENT under this agreement shall be required to follow the above five affirmative steps in the award of any subcontract(s) in any procurement initiated after the date of this Agreement.

The RECIPIENT shall report to the DEPARTMENT at the time of submitting each invoice, on forms provided by the DEPARTMENT, payments made to qualified firms. The report will address:

1. Name and state OMWBE certification number of any qualified firm receiving funds under the voucher, including any sub-and/or sub-subcontractors.
2. The total dollar amount paid to qualified firms under this invoice.

B. USE OF EXISTING CONTRACTS

The RECIPIENT may use existing contracts that conform to adopted procurement procedures and applicable state laws. The RECIPIENT shall notify the DEPARTMENT if it used contracts entered into prior to the execution of the grant agreement for performance of grant funded activities.

C. ALL WRITINGS CONTAINED HEREIN

This agreement, the appended "General Terms and Conditions," and the DEPARTMENT's Administrative Requirements for Ecology Grants and Loans, WDOE 91-18 (Rev. October 2000), contain the entire understanding between the parties, and there are no other understandings or representations except as those set forth or incorporated by reference herein. No subsequent modification(s) or amendment(s) of this grant agreement shall be of any force or effect unless in writing, signed by authorized representatives of the RECIPIENT and DEPARTMENT and made part of this agreement; EXCEPT a letter of amendment will suffice to redistribute the budget without increasing the total eligible project cost or to change the DEPARTMENT's Grant Manager or the RECIPIENT's Project Coordinator or to extend the period of performance as set forth in the Grant Agreement.

IN WITNESS WHEREOF, the parties hereby execute this Grant:

RE: Independent Remedial Action Grant Agreement No. G06
Former Shotgun Range Site No. 8471567

Dear Mr. Putnam:

The enclosed grant agreement will provide up to \$200,000 in matching grant funds to the Arlington Municipal Airport for the independent remediation of the Former Shotgun Range site. If you find the grant agreement satisfactory, please have it signed by the appropriate authorized official and return it to this office as soon as possible. The grant agreement becomes effective upon signature by Laurie Davies, Department of Ecology's Program Manager for the Solid Waste and Financial Assistance Program.

The Department of Ecology reserves the right to withdraw the grant offer if the agreement is not returned within 45 days.

Please contact me at (360) 407-6062, if you have any questions.

Sincerely,

Diane R. Singer

CERTIFIED MAIL

7005 1820 0000 6708 6259

Mr. Rob Putnam
City of Arlington, Arlington Municipal Airport
18204-59th Drive NE
Arlington, WA 98223

Dear Mr. Putnam:

Re: No Further Action Determination under WAC 173-340-515(5) for the following Hazardous Waste Site:

- Name: Arlington Municipal Airport Former Shotgun Range
- Address: 172nd St. NE (SR 531) and 51st Ave. NE, Arlington, WA
- Facility/Site No.: 8471567 (95987863)
- VCP No.: NW 1753 (NW 0055)

Thank you for submitting your independent remedial action report for the Arlington Municipal Airport Former Shotgun Range facility (Site) for review by the State of Washington Department of Ecology (Ecology) under the Voluntary Cleanup Program (VCP). Ecology appreciates your initiative in pursuing this administrative option for cleaning up hazardous waste sites under the Model Toxics Control Act (MTCA), Chapter 70.105D RCW.

This letter constitutes an advisory opinion regarding whether further remedial action is necessary at the Site to meet the substantive requirements of MTCA and its implementing regulations, Chapter 70.105D RCW and Chapter 173-340 WAC. Ecology is providing this advisory opinion under the specific authority of RCW 70.105D.030(1)(i) and WAC 173-340-515(5).

This opinion does not resolve a person's liability to the state under MTCA or protect a person from contribution claims by third parties for matters addressed by the opinion. The state does not have the authority to settle with any person potentially liable under MTCA except in accordance with RCW 70.105D.040(4). The opinion is advisory only and not binding on Ecology.

Ecology's Toxics Cleanup Program has reviewed the following information regarding the Site:

1. Undated briefing packet, Arlington Airport-Former Trap shooting Range, Enviros JN 7380, ca. 1997 (Possibly April 1, 1997 meeting w/Cory Duskin et. al.)
2. Arlington Municipal Airport, Final Report, Phase II Environmental Site Assessment, North of State Highway 531 and East of 43rd Avenue Northeast, Arlington Municipal Airport, Enviros, Inc., September 23, 1993, E1/930513
3. Supplemental Subsurface Exploration, Former Trap Shooting Range, Arlington Municipal Airport, 18204 59th Drive NE, Arlington, Washington, Environmental Associates, Inc., February 9, 1998
- 4.) Supplemental Subsurface Exploration, Former Trap Shooting Range, Arlington Municipal Airport, 18204 59th Drive NE, Arlington, Washington, Environmental Associates, Inc., May 27, 1998
- 5.) Supplemental Groundwater Assessment, Former Trap Shooting Range, Arlington Municipal Airport, 18204 59th Drive NE, Arlington, Washington, Environmental Associates, Inc., August 11, 1998
- 6.) Draft Site Investigation Report, Former Shooting Range-Arlington Airport, Arlington, Washington, IT Corporation, April 2, 2002 (Project # 826842)
7. Feasibility Study, Contaminated Soil Remediation, Former Shooting Range-Arlington Airport, Arlington WA, Shaw Environmental, Inc., January 15, 2004 (Project # 845193)
8. Soil Cleanup Report, Lead-Contaminated Soils, Former Arlington Shotgun Range, Arlington, Washington, Shaw Environmental, Inc., November 30, 2006 (Shaw Project No. 116777)
- 9.) Soil Cleanup Report, cPAH-Contaminated Soils, Former Arlington Shotgun Range, Arlington, WA, Shaw Environmental, Inc., November 30, 2006 (Shaw Project No. 116777)

The documents listed above will be kept in the Central Files of the Northwest Regional Office of Ecology (NWRO) for review by appointment only. Appointments can be made by calling the NWRO resource contact at 425-649-7190.

The Site is defined by the extent of contamination caused by the following release(s):

- Lead (Pb) and Carcinogenic Polynucleated Aromatic Hydrocarbons (cPAHs) in Soil, from historic operation of a shotgun trap shooting range.

The Site is more particularly described in Enclosure A to this letter, which includes a vicinity map and detailed Site diagrams. The description of the Site is based solely on the information contained in the documents listed above.

Mr. Rob Putnam
November 13, 2007
Page 3

Based on a review of the independent remedial action report and supporting documentation listed above, **Ecology has determined that the independent remedial action(s) conducted at the Site are sufficient to meet the substantive requirements contained in MTCA and its implementing regulations, Chapter 70.105D RCW and Chapter 173-340 WAC, for characterizing and addressing the contamination at the Site.** Therefore, pursuant to WAC 173-340-515(5), Ecology is issuing this opinion that **no further remedial action is necessary** at the Site under MTCA.

Based on this no further action determination, Ecology will update the status of the Site on its site database and remove the Site from the Confirmed and Suspected Contaminated Sites List.

This no further action determination does not apply to any other release(s) or potential release(s) of contaminant(s) that may impact any other portion of any property impacted by this Site, or any other property owned or operated by City of Arlington or the Arlington Municipal Airport.

Please note that this opinion is based solely on the information contained in the documents listed above. Therefore, if any of the information contained in those documents is materially false or misleading, then this opinion will automatically be rendered null and void and further remedial action may be required at the Site.

The state, Ecology, and its officers and employees make no guarantees or assurances by providing this opinion, and no cause of action against the state, Ecology, its officers or employees may arise from any act or omission in providing this opinion.

Again, Ecology appreciates your initiative in successfully completing cleanup under the Voluntary Cleanup Program (VCP). If you have any questions regarding this opinion, please contact me at 425-649-7047.

Sincerely,

Norman D. Peck

Cleanup/Decision Summary

Site Name: **Arlington Municipal Airport Former Shotgun Range**

FS ID #: **8471567, 95987863**

VCP #: **NW 0055 and NW 1753**

Site Decision (attach letters): **NFA**

- 1. Site Description (include site address with street, city, and county; physical description; current and historical uses of site; etc.):** The Arlington Municipal Airport Former Shotgun Range is located northeast of the intersection of 172nd St. NE (aka SR 531) and 51st Avenue NE at the south side of the Arlington Municipal Airport in Arlington, Snohomish County, WA. Site history prior to U.S. Navy acquisition in 1941 as part of the Arlington Naval Air Station is unknown. The site name aptly describes the site use from about 1941 until the mid-1970's. After range closure, the site was reportedly used for a short time as a turf farm.
- 2. Describe affected media (soil, groundwater, surface water, sediment, air):** Soils at the site prior to remediation were affected by releases of cPAHs (from trap targets aka "clay pigeons" and lead (Pb) shot from trapshooting activities.
- 3. Cleanup method used:**
 - Method A**
 - Method B (Attempted to utilize Method B Worksheet)
 - Method C
- 4. Describe cleanup activities (for each media) and if contamination remains on-site (including conformational sampling/analysis, points of compliance, etc.):** Pb-contaminated soils were remediated by in-situ treatment-by-generator to avoid regulation as Dangerous Waste followed by off-site disposal at a permitted solid waste landfill. cPAHs were excavated and disposed of at a solid waste landfill. Pb-contaminated brush and trees were grubbed and disposed of at an off-site solid waste landfill. Pb and cPAHs remain on site at below MTCA Method A Cleanup Standards. Point of Compliance is throughout the site.
- 5. Describe restrictive covenant (e.g., contamination remains under structure, groundwater restrictions, 5-year review):** No Environmental Covenant is required at this site, since MTCA Method A Cleanup Standards were met.
- 6. Indicate if site to be delisted: An NFA determination has been made, and it is appropriate to delist this site.**

Voluntary Cleanup Program

Washington State Department of Ecology
Toxics Cleanup Program

APPLICATION FORM

Under the Voluntary Cleanup Program (VCP), the Department of Ecology (Ecology) may provide informal site-specific technical consultations to persons conducting independent remedial actions at a hazardous waste site. Ecology may provide such consultations under the authority of the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, and its implementing regulations, Chapter 173-340 WAC.

To request technical consultations under the VCP, you must submit an application to Ecology. That application must include, at a minimum, the following documents:

- VCP Application Form (including required attachments); ← **THIS DOCUMENT**
- VCP Agreement.

For guidance on how to complete your VCP application, including this Application Form, please refer to the Application Instructions, which are available separately. All of these documents are available for downloading on the VCP web site: <http://www.ecy.wa.gov/programs/tcp/vcp/vcpmain.htm>.

Part 1 - ADMINISTRATION

Client Information. The "Client" is the person or entity seeking informal site-specific technical consultations from Ecology under the VCP. This person must sign the VCP Agreement and is responsible for payment of those costs incurred by Ecology in providing the requested consultative services. Please enter the required information below.

Name: Rob Putnam		Title: Airport Manager	
Organization: City of Arlington - Arlington Municipal Airport			
Mailing address: 18204 59th Drive NE			
City: Arlington		State: WA	Zip: 98223
Phone: (360) 403-3470	Fax: (360) 435-1012	E-mail: rputnam@ci.arlington.wa.us	

What is the Client's involvement at the Site? Please check all that apply.

- | | |
|--|--|
| <input type="checkbox"/> Property owner | <input type="checkbox"/> Business owner (operator) |
| <input type="checkbox"/> Past property owner | <input type="checkbox"/> Mortgage holder |
| <input type="checkbox"/> Future property owner | <input type="checkbox"/> Consultant |
| <input type="checkbox"/> Property lessee | <input type="checkbox"/> Attorney |
| <input checked="" type="checkbox"/> Other – please specify: Municipal Airport Manager _____ | |

If not the current property owner, is the Client acting as the agent for the property owner?

- Yes No

If not the current property owner, is the Client authorized to grant access to the property?

- Yes No

Services Requested by Client.

What type of independent remedial action plan or report are you submitting to Ecology with your application for review under the VCP? Please check all that apply.

- | | |
|--|---|
| <input type="checkbox"/> Interim action plan | <input type="checkbox"/> Remedial investigation plan |
| <input type="checkbox"/> Interim action report | <input type="checkbox"/> Remedial investigation report |
| <input type="checkbox"/> Cleanup action plan | <input type="checkbox"/> Feasibility study report |
| <input type="checkbox"/> Cleanup action plan | <input checked="" type="checkbox"/> Other – please specify: Cleanup Action Rpt |

Do you want Ecology to provide you with a written opinion on the planned or completed independent remedial action?

- Yes No

Please note that Ecology's opinion will be limited to:

- Whether the planned or completed remedial actions at the site meet the substantive requirements of MTCA, and/or
- Whether further remedial action is necessary at the site under MTCA to characterize and address all of the contamination at the site.

Instructions for Data Submittal.

In accordance with WAC 173-340-840(5), when submitting any sampling data to Ecology, please submit the data in both a printed form and an electronic form capable of being transferred into Ecology's data management systems. The data must be submitted consistent with the procedures specified in Ecology's Toxic Cleanup Program Policy 840 (Data Submittal Requirements). Please note that any report submitted to Ecology for review under the VCP that does not comply with these data submittal requirements will be considered incomplete by Ecology.

Part 2 - DESCRIPTION OF THE SITE

Name of the Site. Please enter the name of the Site below.

Name: Former Arlington Shotgun Range - Lead Contaminated Area

Alternate Name

Location of the Site.

Reference Point.

Do you know which property is the source of the release(s) of hazardous substances at the Site (i.e., source property)?

Yes

If you answered "YES," then please refer to the "source property" when answering the following questions regarding the location of the Site, even if your independent remedial action does not address that property.

No

If you answered "NO," then please refer to the "affected property" addressed by your independent remedial action when answering the following questions regarding the location of the Site. An affected property is a property affected by the release(s) on the source property.

Physical Address. Please enter the physical address of the property below.

Name: Arlington Municipal Airport

City: Arlington

State: WA

Zip: 98223

Geographic Position – Latitude (Lat) and Longitude (Long). For additional guidance on how to complete this part of the application form, please refer to the application instructions.

COORDINATES	LATITUDE:	Degrees: N 48	Minutes: 9	Seconds: 13.6
	LONGITUDE:	Degrees: W -122	Minutes: 9	Seconds: 55.1
LOCATION ON PROPERTY: [e.g., point of release or center of parcel]	Northern end of former shooting range			
COLLECTION METHOD: [e.g., GPS or address matching]	Ecology EIM Lat/Long Builder			
COLLECTION SOURCE: [i.e., map scale]	EIM website			
HORIZONTAL DATUM: [i.e., base reference for coordinate system]				
ACCURACY LEVEL: [i.e., +/- feet or meters]				

Legal Descriptions.

TRS DATA:	Township: 31N	Range: 5E	Section: 21	Quarter-Quarter: SE
TAX PARCEL #(s):	31052100400100			

Extent of the Site.

What is the approximate areal extent of the Site? Please check only one.

- < 5,000 square feet
 > 5,000 square feet, but < 1 acre
 > 1 acre, but < 10 acres
 > 10 acres
 Unknown

Properties Affected by the Site.

Do any of the releases on the source property affect any properties adjacent to the source property (affected properties)?

- Yes No Unknown

If you answered "YES" above, then please identify each property that you know has been affected by the release(s) on the source property. If you need to identify additional properties, please attach additional pages.

1.	Address:
	Tax Parcel(s):
2.	Address:
	Tax Parcel(s):
3.	Address:
	Tax Parcel(s):
4.	Address:
	Tax Parcel(s):

Do any of the releases affect any right-of-ways (e.g., streets) located on or adjacent to the source property?

- Yes No Unknown

If you answered "YES" above, please specify:

Is the source property affected by any release(s) on properties adjacent to the source property?

- Yes No Unknown

If you answered "YES" above, please specify:

Description of Release(s) at the Site.**Source of Release(s).**

What are the source(s) of the release(s) at the Site? Please check all that apply.

- Point source (e.g., leaking tank)
 Non-point source (e.g., contaminated soil used as fill)
 Area-wide lead and arsenic soil contamination (see Question #4 below)
 Other – please specify: Lead shot from target shooting at former shooting range
 Unknown

To the extent known, please describe the source(s) of the release(s): Lead shot

Circumstances of Release(s). To the extent known, please describe below the circumstances of the release(s).

Lead shot distributed over given area during target shooting activities at former shooting range

Circumstances of Release Discovery. To the extent known, please describe below the circumstances of the discovery of the release(s).

Identified based on known former land use and subsequent sampling activities.

Area-Wide Soil Contamination. For guidance on how to complete this part of the application form, please refer to the application instructions and the area-wide soil contamination tool box located at the following Ecology web site: http://www.ecy.wa.gov/programs/tcp/area_wide/area_wide_hp.html.

Is the Site located within an area affected by smelter emissions, such as the Tacoma Smelter Plume area, or on a former apple or pear orchard in operation prior to 1947?

Yes No Unknown

Does the Site contain area-wide arsenic and/or lead soil contamination?

Yes No Unknown

Nature and Extent of Hazardous Substances Released at the Site.

Hazardous Substances and Affected Media. To the extent known, please identify in the following table the hazardous substances released at the Site and the media (e.g., soil) impacted by those substances using the codes at the bottom of the table.

HAZARDOUS SUBSTANCE	AFFECTED MEDIA				
	SOIL	GROUND WATER	SURFACE WATER	SEDIMENT	AIR
EXAMPLE: Benzene	C	S	N/A	N/A	B
lead	C	O	N/A	N/A	N/A

- When identifying the affected media in the table above, please use one of the following codes:
- C = confirmed, above cleanup level
 - B = confirmed, below cleanup level
 - O = confirmed, not present
 - S = suspected
 - N/A = not suspected
 - U = unknown

Drinking Water.

Does any of the contamination at the Site pose a threat or potential threat to an existing drinking water source (ground water or surface water)?

Yes No Unknown

If you answered "YES" above, what type of drinking water system is threatened by the contamination? Please check all that apply.

Single Family
 Community

Indoor Air.

Are contaminate odors present in any buildings, manholes, or other confined spaces?

Yes No Unknown

If you answered "YES" above, please specify:

Maps of the Site.

Please attach to this application map(s) that identify, to the extent known, the following:

- The location of the site
- The properties affected by the site
- The source(s) of the release(s) at the site
- The nature and extent of contamination at the site
- Any human or ecological receptors impacted by the site (e.g., drinking water wells)
- The physical characteristics of the site (e.g., property lines, building and road outlines, surface water bodies, water supply wells, ground water flow direction, and utility right-of-ways)
- The properties adjacent to the site and the uses of those properties (e.g., gas station, dry cleaner, residential).

Part 3 – OPERATIONAL HISTORY OF THE SITE

Current Use of Source Property. *Note that the following questions refer only to the Source Property, not other properties affected by the Site. Please answer these questions to the best of your ability.*

Current Property Owners. To the extent known, please identify below the current owner(s) of the source property.

Name: City of Arlington

Title: Municipality

Organization: Arlington Municipal Airport

Mailing address: 18204 59th Drive NE

City: Arlington

State: WA

Zip code: 98223

Phone: (360) 435-3470

Current Business Owner (Operator). To the extent known, please identify below the current owner of the business located on the source property.

Name: Rob Putnam

Title: Airport Manager

Organization: City of Arlington - Arlington Municipal Airport

Mailing address: 18204 59th Drive NE

City: Arlington

State: WA

Zip code: 98223

Phone: (360) 435-3470

Current Business Operations. To the extent known, please identify below the current operations of the business located on the source property.

What is the current land use of the source property? Please check all that apply.

- Residential School
 Commercial Childcare facility
 Industrial Park
 Agricultural
 Other – please specify: vacant

Is there a currently operational commercial or industrial business located on the source property?

- Yes No Unknown

If you answered "YES" above, please identify in the following table the current business operations using the North American Industry Classification System (NAICS) codes and specifying the operations.

NAICS CODE	DESCRIPTION OF OPERATIONS
EX: 447110	Gasoline Stations with Convenience Stores

Is there a solid waste handling facility located on the Source Property?

- Yes No Unknown

If you answered "YES" above, please identify:

Is there a dangerous waste treatment, storage, or disposal facility located on the Source Property?

- Yes No Unknown

If you answered "YES" above, please identify:

Regulation of Current Business Operations.

Does the business operate under any federal, state, or local permits related to the release of hazardous substances into the environment (e.g., NPDES permit)?

- Yes No Unknown

If you answered "YES" above, please specify the regulated operation, the name of the permit, and the date it was issued in the table below.

REGULATED OPERATION	PERMIT	DATE ISSUED
EX: Wastewater discharge	NPDES permit	02/02/02

Has a state or federal notice of enforcement action (e.g., notice of violation) ever been issued related to the release of hazardous substances at the business?

- Yes No Unknown

If you answered "yes" above, please specify (notice and year issued):

Have business operations resulted in any other spills or other unpermitted releases on the source property?

Yes No Unknown

If you answered "YES" above, please specify in the table below.

RELEASE	DATE OF RELEASE	STATUS OF RELEASE

Storage Tank Information. In table below, please identify all above ground storage tanks (AST) and underground storage tanks (UST) that have been used for storing hazardous substances on the source property, irrespective of whether the tanks are still in use or in place. *If you are unable to provide answers to specific questions regarding a tank, please enter "U" for unknown.*

IDENTIFICATION				STATUS AND CLOSURE				RELEASES	
Hazardous Substance	Type (AST/UST)	Size (Gallons)	TANK ID	DATE INSTALL	IN USE (Y/N)	DATE CLOSED	CLOSURE METHOD (*)	PAST (Y/N)	CURRENT (Y/N)
EX: Diesel	UST	10,000	4	02/87	N	05/98	Removed	Y	N

(*) Options = Removed or Closed in Place

Past Use of Source Property. Note that the following questions refer only to the Source Property, not other properties affected by the Site. Please answer these questions to the best of your ability.

Past Property Owners. To the extent known, please identify below the current owner(s) of the source property:

Name: United States Department of Navy Title: _____

Organization: _____

Mailing address: _____

City: _____ State: _____ Zip code: _____

Phone: _____ Fax: _____ E-mail: _____

Past Business Owners (Operators). To the extent known, please identify below the current owner(s) of the source property.

Name: United States Department of Navy Title: _____

Organization: _____

Mailing address: _____

City: _____ State: _____ Zip code: _____

Phone: _____ Fax: _____ E-mail: _____

Identification of Past Business Operations. Please identify in the following table the past operations of businesses located on the source property using the North American Industry Classification System (NAICS) codes and/or specifying the operations.

NAICS CODE	DESCRIPTION OF OPERATIONS
EX: 447110	Gasoline Stations with Convenience Stores

Future Use of Source and Affected Properties. The following questions refer to both source and affected properties. Please answer these questions to the best of your ability.

Will any ownership interest in the source or affected properties be conveyed prior to, or upon completion of, the cleanup?

- Yes No Unknown

If you answered "YES" above, please specify:

Will any of the source or affected properties, or portions of those properties, be redeveloped as part of the cleanup?

- Yes No Unknown

If you answered "YES" above, please specify the proposed land use below. Please check all that apply.

- Residential School
 Commercial Childcare facility
 Industrial Park
 Agricultural
 Other – please specify: _____

Please also specify the activities proposed for that land use:

Part 4 – ADMINISTRATIVE HISTORY OF THE SITE

Have you previously reported the release(s) of hazardous substances at the Site to Ecology?

- Yes – If so, when? _____ No Unknown

Has the cleanup of the Site, or any portion of the Site, ever been managed under the VCP?

- Yes – If so, please specify the VCP Project ID#: NW0443
 No
 Unknown

Has the cleanup of the Site, or any portion of the Site, ever been managed under a federal or state order or decree?

- Yes – If so, please specify the type and docket #:
 No
 Unknown

Part 5 – DESCRIPTION OF INDEPENDENT REMEDIAL ACTIONS AT THE SITE

Scope of Remedial Actions.

Do you plan to characterize and address all of the contamination at the Site, including any contamination located on affected adjacent properties, as part of the VCP project?

Yes No Unknown

If you answered "NO" above, please describe below the scope of the VCP project, including the contamination (properties, portions of a property, media and/or hazardous substances) that you DO NOT plan on characterizing and/or addressing as part of the VCP project. Please include additional pages if necessary.

Status of Remedial Actions.

What is the current status of remedial actions at the site? Please check all that apply in the table below.

REMEDIAL ACTION	PLANNED	ONGOING	COMPLETED	NOT APPLICABLE
INITIAL RESPONSE (UST ONLY)				X
INTERIM ACTION				X
REMEDIAL INVESTIGATION			X	
FEASIBILITY STUDY			X	
CLEANUP ACTION			X	

Documentation of Remedial Actions.

Please list in the table below all known remedial action plans or reports produced for the site, including:

- The title of the plan or report,
- The author (e.g. consulting firm) of the plan or report,
- The date the plan or report was produced,
- Whether the plan or report has been submitted to Ecology,
- The date the plan or report was submitted to Ecology.

	TITLE	AUTHOR	DATE	SUBMITTED TO ECOLOGY	
				Y/N?	DATE
EX:	John Doe's Property: Remedial Investigation Work Plan	Mom's Consulting Firm	02/20/99	NO	N/A
1.	Cleanup Action Plan, Contaminated Soil Remediation	Shaw Environmental, Inc.	11/23/05	Y	11/23/05
2.					
3.					
4.					
5.					
6.					
7.					
8.					
9.					
10.					

Part 6 – STATEMENT AND SIGNATURE

Statement and Signature. The undersigned affirms that the information contained in this application is true and accurate to the best of his or her knowledge. Please note that someone other than the Client may sign this Application Form.

Name: Rob Putnam	<i>Rob Putnam</i>	Title: Airport Manager
Organization: City of Arlington - Arlington Municipal Airport		
Mailing address: 18204 59 th Drive NE		
City: Arlington	State: WA	Zip code: 98223
Phone: (360) 403-3470	Fax: (360) 435-1012	E-mail: rputnam@ci.arlington.wa.us

Affiliation.

What is the signatory's involvement at the Site? Please check all that apply.

- Client
- Property Owner
- Consultant
- Attorney
- Other – please specify:

SUBMITTAL INSTRUCTIONS

To complete your application, please submit the following materials to the Ecology regional office for the County in which your Site is located:

- 1 - VCP Application Form (signed)
- 2 - VCP Agreement (signed by Client)
- 3 - Independent Remedial Action Plan(s) or Report(s) (see Part I.D of VCP Application Form)
- 4 - Map(s) of the Site (see Part II.G of VCP Application Form)
- 5 - Terrestrial Ecological Evaluation Exclusion Form (if applicable)

To identify the appropriate Ecology regional office, please refer to the following map:

<p>Northwest Region: Attn: Dale Myers 3190 160th Ave. SE Bellevue, WA 98008-5452</p>	<p>Central Region: Attn: Mark Dunbar 15 W. Yakima Ave., Suite 200 Yakima, WA 98902</p>
<p>Southwest Region: Attn: Bob Warren P.O. Box 47775 Olympia, WA 98504-7775</p>	<p>Eastern Region: Attn: Patti Carter N. 4601 Monroe Spokane, WA 99205-1295</p>

If you have any questions regarding the application process or how to complete the forms, please contact the appropriate regional office contact listed below:

<p>Northwest Region: Mark Edens, Unit Supervisor (425) 649-7070 mede461@ecy.wa.gov</p>	<p>Central Region: Valerie Drew, Unit Supervisor (509) 454-7886 vdre461@ecy.wa.gov</p>
<p>Southwest Region: Bob Warren, Unit Supervisor (360) 407-6361 rwar461@ecy.wa.gov</p>	<p>Eastern Region: Sherman Spencer, Unit Supervisor (509) 329-3408 sspe461@ecy.wa.gov</p>

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360-407-7170. Persons with hearing loss can call 711 for Washington Relay Service. Persons with a speech disability can call 877-833-6341.

ECY #020-74 (revised 6/06)

Voluntary Cleanup Program

Washington State Department of Ecology
Toxics Cleanup Program

APPLICATION FORM

Under the Voluntary Cleanup Program (VCP), the Department of Ecology (Ecology) may provide informal site-specific technical consultations to persons conducting independent remedial actions at a hazardous waste site. Ecology may provide such consultations under the authority of the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, and its implementing regulations, Chapter 173-340 WAC.

To request technical consultations under the VCP, you must submit an application to Ecology. That application must include, at a minimum, the following documents:

- VCP Application Form (including required attachments); ← **THIS DOCUMENT**
- VCP Agreement.

For guidance on how to complete your VCP application, including this Application Form, please refer to the Application Instructions, which are available separately. All of these documents are available for downloading on the VCP web site: <http://www.ecy.wa.gov/programs/tcp/vcp/vcpmain.htm>.

Part 1 - ADMINISTRATION

Client Information. The "Client" is the person or entity seeking informal site-specific technical consultations from Ecology under the VCP. This person must sign the VCP Agreement and is responsible for payment of those costs incurred by Ecology in providing the requested consultative services. Please enter the required information below.

Services Requested by Client.

What type of independent remedial action plan or report are you submitting to Ecology with your application for review under the VCP? Please check all that apply.

- | | |
|--|---|
| <input type="checkbox"/> Interim action plan | <input type="checkbox"/> Remedial investigation plan |
| <input type="checkbox"/> Interim action report | <input type="checkbox"/> Remedial investigation report |
| <input type="checkbox"/> Cleanup action plan | <input type="checkbox"/> Feasibility study report |
| <input type="checkbox"/> Cleanup action plan | <input checked="" type="checkbox"/> Other – please specify: Cleanup Action Rpt |

Do you want Ecology to provide you with a written opinion on the planned or completed, independent remedial action?

- Yes No

Please note that Ecology's opinion will be limited to:

- Whether the planned or completed remedial actions at the site meet the substantive requirements of MTCA, and/or
- Whether further remedial action is necessary at the site under MTCA to characterize and address all of the contamination at the site.

Instructions for Data Submittal.

In accordance with WAC 173-340-840(5), when submitting any sampling data to Ecology, please submit the data in both a printed form and an electronic form capable of being transferred into Ecology's data management systems. The data must be submitted consistent with the procedures specified in Ecology's Toxic Cleanup Program Policy 840 (Data Submittal Requirements). Please note that any report submitted to Ecology for review under the VCP that does not comply with these data submittal requirements will be considered incomplete by Ecology.

Part 2 - DESCRIPTION OF THE SITE

Name of the Site. Please enter the name of the Site below.

Name: Former Arlington Shotgun Range - cPAH Contaminated Area

Alternate Name

Location of the Site.

Reference Point.

Do you know which property is the source of the release(s) of hazardous substances at the Site (i.e., source property)?

- Yes *If you answered "YES," then please refer to the "source property" when answering the following questions regarding the location of the Site, even if your independent remedial action does not address that property.*
- No *If you answered "NO," then please refer to the "affected property" addressed by your independent remedial action when answering the following questions regarding the location of the Site. An affected property is a property affected by the release(s) on the source property.*

Physical Address. Please enter the physical address of the property below.

Name: Arlington Municipal Airport

City: Arlington State: WA Zip: 98223

Geographic Position – Latitude (Lat) and Longitude (Long). For additional guidance on how to complete this part of the application form, please refer to the application instructions.

COORDINATES	LATITUDE:	Degrees: N 48	Minutes: 9	Seconds: 10.7
	LONGITUDE :	Degrees: W -122	Minutes: 9	Seconds: 54.8

LOCATION ON PROPERTY: [e.g., point of release or center of parcel] Southern end of former shooting range

COLLECTION METHOD: [e.g., GPS or address matching] Ecology EIM Lat/Long Builder

COLLECTION SOURCE: [i.e., map scale] EIM website

HORIZONTAL DATUM: [i.e., base reference for coordinate system]

ACCURACY LEVEL: [i.e., +/- feet or meters]

Legal Descriptions.

TRS DATA: Township: 31N Range: 5E Section: 21 Quarter-Quarter: SE

TAX PARCEL #(s): 31052100400100

Extent of the Site.

What is the approximate areal extent of the Site? Please check only one.

- < 5,000 square feet
- > 5,000 square feet, but < 1 acre
- > 1 acre, but < 10 acres
- > 10 acres
- Unknown

Properties Affected by the Site.

Do any of the releases on the source property affect any properties adjacent to the source property (affected properties)?

- Yes No Unknown

If you answered "YES" above, then please identify each property that you know has been affected by the release(s) on the source property. If you need to identify additional properties, please attach additional pages.

1.	Address:
	Tax Parcel(s):
2.	Address:
	Tax Parcel(s):
3.	Address:
	Tax Parcel(s):
4.	Address:
	Tax Parcel(s):

Do any of the releases affect any right-of-ways (e.g., streets) located on or adjacent to the source property?

- Yes No Unknown

If you answered "YES" above, please specify:

Is the source property affected by any release(s) on properties adjacent to the source property?

- Yes No Unknown

If you answered "YES" above, please specify:

Description of Release(s) at the Site.

Source of Release(s).

What are the source(s) of the release(s) at the Site? Please check all that apply.

- Point source (e.g., leaking tank)
- Non-point source (e.g., contaminated soil used as fill)
- Area-wide lead and arsenic soil contamination (see Question #4 below)
- Other – please specify: Target fragments from target shooting at former shooting range
- Unknown

To the extent known, please describe the source(s) of the release(s): Shooting target fragments

Circumstances of Release(s). To the extent known, please describe below the circumstances of the release(s).

Target fragments distributed over given area during target shooting activities at former shooting range

Circumstances of Release Discovery. To the extent known, please describe below the circumstances of the discovery of the release(s).

Identified based on known former land use and subsequent sampling activities.

Area-Wide Soil Contamination. For guidance on how to complete this part of the application form, please refer to the application instructions and the area-wide soil contamination tool box located at the following Ecology web site: http://www.ecy.wa.gov/programs/tcp/area_wide/area_wide_hp.html.

Is the Site located within an area affected by smelter emissions, such as the Tacoma Smelter Plume area, or on a former apple or pear orchard in operation prior to 1947?

Yes No Unknown

Does the Site contain area-wide arsenic and/or lead soil contamination?

Yes No Unknown

Nature and Extent of Hazardous Substances Released at the Site.

Hazardous Substances and Affected Media. To the extent known, please identify in the following table the hazardous substances released at the Site and the media (e.g., soil) impacted by those substances using the codes at the bottom of the table.

HAZARDOUS SUBSTANCE	AFFECTED MEDIA				
	SOIL	GROUND WATER	SURFACE WATER	SEDIMENT	AIR
EXAMPLE: Benzene	C	S	N/A	N/A	B
carcinogenic polycyclic aromatic hydrocarbons (cPAH)	C	O	N/A	N/A	N/A

When identifying the affected media in the table above, please use one of the following codes:

- C = confirmed, above cleanup level
- B = confirmed, below cleanup level
- Q = confirmed, not present
- S = suspected
- N/A = not suspected
- U = unknown

Drinking Water.

Does any of the contamination at the Site pose a threat or potential threat to an existing drinking water source (ground water or surface water)?

Yes No Unknown

If you answered "YES" above, what type of drinking water system is threatened by the contamination? Please check all that apply.

Single Family
 Community

Indoor Air.

Are contaminate odors present in any buildings, manholes, or other confined spaces?

Yes No Unknown

If you answered "YES" above, please specify:

Maps of the Site.

Please attach to this application map(s) that identify, to the extent known, the following:

- The location of the site
- The properties affected by the site
- The source(s) of the release(s) at the site
- The nature and extent of contamination at the site
- Any human or ecological receptors impacted by the site (e.g., drinking water wells)
- The physical characteristics of the site (e.g., property lines, building and road outlines, surface water bodies, water supply wells, ground water flow direction, and utility right-of-ways)
- The properties adjacent to the site and the uses of those properties (e.g., gas station, dry cleaner, residential).

Part 3 – OPERATIONAL HISTORY OF THE SITE

Current Use of Source Property. *Note that the following questions refer only to the Source Property, not other properties affected by the Site. Please answer these questions to the best of your ability.*

Current Property Owners. To the extent known, please identify below the current owner(s) of the source property.

Name: City of Arlington

Title: Municipality

Organization: Arlington Municipal Airport

Mailing address: 18204 59th Drive NE

City: Arlington

State: WA

Zip code: 98223

Phone: (360) 435-3470

Current Business Owner (Operator). To the extent known, please identify below the current owner of the business located on the source property.

Name: Rob Putnam

Title: Airport Manager

Organization: City of Arlington - Arlington Municipal Airport

Mailing address: 18204 59th Drive NE

City: Arlington

State: WA

Zip code: 98223

Phone: (360) 435-3470

Current Business Operations. To the extent known, please identify below the current operations of the business located on the source property.

What is the current land use of the source property? Please check all that apply.

- Residential School
 Commercial Childcare facility
 Industrial Park
 Agricultural
 Other – please specify: vacant

Is there a currently operational commercial or industrial business located on the source property?

- Yes No Unknown

If you answered "YES" above, please identify in the following table the current business operations using the North American Industry Classification System (NAICS) codes and specifying the operations.

NAICS CODE	DESCRIPTION OF OPERATIONS
EX: 447110	Gasoline Stations with Convenience Stores

Is there a solid waste handling facility located on the Source Property?

- Yes No Unknown

If you answered "YES" above, please identify:

Is there a dangerous waste treatment, storage, or disposal facility located on the Source Property?

- Yes No Unknown

If you answered "YES" above, please identify:

Regulation of Current Business Operations.

Does the business operate under any federal, state, or local permits related to the release of hazardous substances into the environment (e.g., NPDES permit)?

- Yes No Unknown

If you answered "YES" above, please specify the regulated operation, the name of the permit, and the date it was issued in the table below.

REGULATED OPERATION	PERMIT	DATE ISSUED
EX: Wastewater discharge	NPDES permit	02/02/02

Has a state or federal notice of enforcement action (e.g., notice of violation) ever been issued related to the release of hazardous substances at the business?

- Yes No Unknown

If you answered "yes" above, please specify (notice and year issued):

Have business operations resulted in any other spills or other unpermitted releases on the source property?

Yes No Unknown

If you answered "YES" above, please specify in the table below.

RELEASE	DATE OF RELEASE	STATUS OF RELEASE

Storage Tank Information. In table below, please identify all above ground storage tanks (AST) and underground storage tanks (UST) that have been used for storing hazardous substances on the source property, irrespective of whether the tanks are still in use or in place. *If you are unable to provide answers to specific questions regarding a tank, please enter "U" for unknown.*

IDENTIFICATION				STATUS AND CLOSURE				RELEASES	
Hazardous Substance	Type (AST/UST)	Size (Gallons)	TANK ID	DATE INSTALL	IN USE (Y/N)	DATE CLOSED	CLOSURE METHOD (*)	PAST (Y/N)	CURRENT (Y/N)
EX: Diesel	UST	10,000	4	02/87	N	05/98	Removed	Y	N

(*) Options = Removed or Closed in Place

Past Use of Source Property. Note that the following questions refer only to the Source Property, not other properties affected by the Site. Please answer these questions to the best of your ability.

Past Property Owners. To the extent known, please identify below the current owner(s) of the source property.

Name: United States Department of Navy	Title:
Organization:	
Mailing address:	
City:	State: Zip code:
Phone:	Fax: E-mail:

Past Business Owners (Operators). To the extent known, please identify below the current owner(s) of the source property.

Name: United States Department of Navy	Title:
Organization:	
Mailing address:	
City:	State: Zip code:
Phone:	Fax: E-mail:

Identification of Past Business Operations. Please identify in the following table the past operations of businesses located on the source property using the North American Industry Classification System (NAICS) codes and/or specifying the operations.

NAICS CODE	DESCRIPTION OF OPERATIONS
EX: 447110	Gasoline Stations with Convenience Stores

Future Use of Source and Affected Properties. The following questions refer to both source and affected properties. Please answer these questions to the best of your ability.

Will any ownership interest in the source or affected properties be conveyed prior to, or upon completion of, the cleanup?

- Yes No Unknown

If you answered "YES" above, please specify:

Will any of the source or affected properties, or portions of those properties, be redeveloped as part of the cleanup?

- Yes No Unknown

If you answered "YES" above, please specify the proposed land use below. Please check all that apply.

- Residential School
 Commercial Childcare facility
 Industrial Park
 Agricultural
 Other – please specify: _____

Please also specify the activities proposed for that land use:

Part 4 – ADMINISTRATIVE HISTORY OF THE SITE

Have you previously reported the release(s) of hazardous substances at the Site to Ecology?

- Yes – If so, when? _____ No Unknown

Has the cleanup of the Site, or any portion of the Site, ever been managed under the VCP?

- Yes – If so, please specify the VCP Project ID#: NW0443
 No
 Unknown

Has the cleanup of the Site, or any portion of the Site, ever been managed under a federal or state order or decree?

- Yes – If so, please specify the type and docket #:
 No
 Unknown

Part 5 – DESCRIPTION OF INDEPENDENT REMEDIAL ACTIONS AT THE SITE

Scope of Remedial Actions.

Do you plan to characterize and address all of the contamination at the Site, including any contamination located on affected adjacent properties, as part of the VCP project?

Yes No Unknown

If you answered "NO" above, please describe below the scope of the VCP project, including the contamination (properties, portions of a property, media and/or hazardous substances) that you DO NOT plan on characterizing and/or addressing as part of the VCP project. Please include additional pages if necessary.

Status of Remedial Actions.

What is the current status of remedial actions at the site? Please check all that apply in the table below.

REMEDIAL ACTION	PLANNED	ONGOING	COMPLETED	NOT APPLICABLE
INITIAL RESPONSE (UST ONLY)				X
INTERIM ACTION				X
REMEDIAL INVESTIGATION			X	
FEASIBILITY STUDY			X	
CLEANUP ACTION			X	

Documentation of Remedial Actions.

Please list in the table below all known remedial action plans or reports produced for the site, including:

- The title of the plan or report,
- The author (e.g. consulting firm) of the plan or report,
- The date the plan or report was produced,
- Whether the plan or report has been submitted to Ecology,
- The date the plan or report was submitted to Ecology.

	TITLE	AUTHOR	DATE	SUBMITTED TO ECOLOGY	
				Y/N?	DATE
EX:	John Doe's Property: Remedial Investigation Work Plan	Mom's Consulting Firm	02/20/99	NO	N/A
1.	Cleanup Action Plan, Contaminated Soil Remediation	Shaw Environmental, Inc.	11/23/05	Y	11/23/05
2.					
3.					
4.					
5.					
6.					
7.					
8.					
9.					
10.					

Part 6 – STATEMENT AND SIGNATURE

Statement and Signature. The undersigned affirms that the information contained in this application is true and accurate to the best of his or her knowledge. Please note that someone other than the Client may sign this Application Form.

Name: Rob Putnam		Title: Airport Manager
Organization: City of Arlington - Arlington Municipal Airport		
Mailing address: 18204 59 th Drive NE		
City: Arlington	State: WA	Zip code: 98223
Phone: (360) 403-3470	Fax: (360) 435-1012	E-mail: rputnam@ci.arlington.wa.us

Affiliation.

What is the signatory's involvement at the Site? Please check all that apply.

- Client
- Property Owner
- Consultant
- Attorney
- Other – please specify:

SUBMITTAL INSTRUCTIONS

To complete your application, please submit the following materials to the Ecology regional office for the County in which your Site is located:

- 1 - VCP Application Form (signed)
- 2 - VCP Agreement (signed by Client)
- 3 - Independent Remedial Action Plan(s) or Report(s) (see Part I.D of VCP Application Form)
- 4 - Map(s) of the Site (see Part II.G of VCP Application Form)
- 5 - Terrestrial Ecological Evaluation Exclusion Form (if applicable)

To identify the appropriate Ecology regional office, please refer to the following map:

<p>Northwest Region: Attn: Dale Myers 3190 160th Ave. SE Bellevue, WA 98008-5452</p>	<p>Central Region: Attn: Mark Dunbar 15 W. Yakima Ave., Suite 200 Yakima, WA 98902</p>
<p>Southwest Region: Attn: Bob Warren P.O. Box 47775 Olympia, WA 98504-7775</p>	<p>Eastern Region: Attn: Patti Carter N. 4601 Monroe Spokane, WA 99205-1295</p>

If you have any questions regarding the application process or how to complete the forms, please contact the appropriate regional office contact listed below:

<p>Northwest Region: Mark Edens, Unit Supervisor (425) 649-7070 mede461@ecy.wa.gov</p>	<p>Central Region: Valerie Drew, Unit Supervisor (509) 454-7886 vdre461@ecy.wa.gov</p>
<p>Southwest Region: Bob Warren, Unit Supervisor (360) 407-6361 rwar461@ecy.wa.gov</p>	<p>Eastern Region: Sherman Spencer, Unit Supervisor (509) 329-3408 sspe461@ecy.wa.gov</p>

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360-407-7170. Persons with hearing loss can call 711 for Washington Relay Service. Persons with a speech disability can call 877-833-6341.

ECY #020-74 (revised 6/06)

VCP AGREEMENT

- Facility/Site Name: _____
- Facility/Site No.: _____
- VCP Project No: _____

For Office Administrative Use Only

This document constitutes an Agreement between the State of Washington Department of Ecology (Ecology) and City of Arlington - Arlington Municipal Airport (Client) to provide informal site-specific technical consultations under the Voluntary Cleanup Program (VCP) for the Site identified above and associated with the following address: Former Shooting Range - cPAH Contaminated Area - Arlington Municipal Airport, 18204 59th Drive NE, Arlington, WA

The purpose of this Agreement is to facilitate independent remedial action at the Site. Ecology is entering into this Agreement under the authority of the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, and its implementing regulations, Chapter 173-340 WAC. If a term in this Agreement is defined in MTCA or Chapter 173-340 WAC, then that definition shall govern.

Services Provided by Ecology

Upon request, Ecology agrees to provide the Client informal site-specific technical consultations on the independent remedial actions proposed for or performed at the Site consistent with WAC 173-340-515(5). Those consultations may include assistance in identifying applicable regulatory requirements and opinions on whether the remedial actions proposed for or conducted at the Site meet those requirements.

Ecology may use any appropriate resource to provide the Client with the requested consultative services. Those resources may include, but shall not be limited to, those of Ecology and the Office of the Attorney General. However, Ecology shall not use independent contractors unless the Client provides Ecology with prior written authorization.

In accordance with RCW 70.105D.030(1)(i), any opinions provided by Ecology under this Agreement are advisory only and not binding on Ecology. Ecology, the state, and officers and employees of the state are immune from all liability. Furthermore, no cause of action of any nature may arise from any act or omission in providing, or failing to provide, informal advice and assistance under the VCP.

Payment for Services by Client

The Client agrees to pay all costs incurred by Ecology in providing the informal site-specific technical consultations requested by the Client consistent with WAC 173-340-515(6) and 173-340-515(6). Those costs may include the costs incurred by attorneys or independent contractors used by Ecology to provide the requested consultative services. Ecology's hourly costs shall be determined based on the method in WAC 173-340-550(2).

Ecology shall mail the Client a monthly itemized statement of costs (invoice) by the tenth day of each month (invoice date) that there is a balance on the account. The invoice shall include a summary of the costs incurred, payments received, identity of staff involved, and amount of time staff spent on the project.

The Client shall pay the required amount by the due date, which shall be thirty (30) calendar days after the invoice date. If payment has not been received by the due date, then Ecology shall withhold any requested opinions and notify the Client by certified mail that the debt is past due. If payment has not been received within sixty (60) calendar days of the invoice date, then Ecology shall stop all work under the Agreement and may, as appropriate, assign the debt to a collection agency under Chapter 19.16 RCW. The Client agrees to pay the collection agency fee incurred by Ecology in the course of debt collection.

TERRESTRIAL ECOLOGICAL EVALUATION EXCLUSION FORM

Under the Model Toxics Control Act (MTCA), a Terrestrial Ecological Evaluation (TEE) is not required if the Site meets the criteria in WAC 173-340-7491 for an exclusion. If you determine that your Site does not require a TEE, please complete this form and submit it to the Department of Ecology (Ecology) at the appropriate time, either with your VCP application or with a subsequent request for a written opinion. Please note that exclusion from the TEE does not exclude the Site from an evaluation of aquatic or sediment ecological receptors.

If your Site does not meet the criteria for exclusion under WAC 173-340-7491, then you may have to conduct a simplified TEE in accordance with WAC 173-340-7492 or a site-specific TEE in accordance with WAC 173-340-7493. If you have questions about conducting a simplified or site-specific TEE, please contact the Ecology site manager assigned to your Site or the appropriate Ecology regional office.

Step 1: IDENTIFY HAZARDOUS WASTE SITE AND EVALUATOR

Please identify below the hazardous waste site for which you are documenting an exclusion from conducting a TEE and the name of the person who conducted the evaluation.

Facility/Site Name: Former Shooting Range – cPAH Contaminated Area

Facility/Site Address: Arlington Municipal Airport, 18204 59th Avenue NE, Arlington, WA

Facility/Site No:

VCP Project No.:

Name of Evaluator: Nnamdi Madakor

Step 2: DOCUMENT BASIS FOR EXCLUSION

The bases for excluding a site from a terrestrial ecological evaluation are set forth in WAC 173-340-7491(1). Please identify below the basis for excluding your Site from further evaluation. Please check all that apply.

POINT OF COMPLIANCE – WAC 173-340-7491(1)(A)

- 1- No contamination present at site.
- 2- All contamination is 15 feet below ground level prior to remedial activities.
- 3- All contamination is six feet below ground level and an institutional control has been implemented as required by WAC 173-340-440.
- 4- All contamination is below a site-specific point of compliance established in compliance with WAC 173-340-7490(4)(b) with an institutional control implemented as required by WAC 173-340-440. **Please provide documentation that describes the rational for setting a site-specific point of compliance.**

BARRIERS TO EXPOSURE – WAC 173-340-7491(1)(b)

- 5- All contaminated soil, is or will be, covered by physical barriers (such as buildings or paved roads) that prevent exposure to plants and wildlife and an institutional control has been implemented as required by WAC 173-340-440. **An exclusion based on future land use must have a completion date for future development that is acceptable to Ecology.**

Step 2: DOCUMENT BASIS FOR EXCLUSION – CONTINUED

UNDEVELOPED LAND – WAC 173-340-7491(1)(c)

“Undeveloped land” is land that is not covered by building, roads, paved areas, or other barriers that would prevent wildlife from feeding on plants, earthworms, insects, or other food in or on the soil.

“Contiguous” undeveloped land is an area of undeveloped land that is not divided into smaller areas of highways, extensive paving, or similar structures that are likely to reduce the potential use of the overall area by wildlife.

- 6- There is less than one-quarter acre of contiguous undeveloped land on or within 500 feet of any area of the Site and any of the following chemicals is present: chlorinated dioxins or furans, PCB mixtures, DDT, DDE, DDD, aldrin, chlordane, dieldrin, endosulfan, endrin, heptachlor, heptachlor epoxide, benzene hexachloride, toxaphene, hexachlorobenzene, pentachlorophenol, or pentachlorobenzene.
- 7- For sites not containing any of the chemicals mentioned above, there is less than one-and-a-half acres of contiguous undeveloped land on or within 500 feet of any area of the Site.

BACKGROUND CONCENTRATIONS – WAC 173-340-7491(1)(d)

- 8- Concentrations of hazardous substances in soil do not exceed background levels as described in WAC 173-340-709.

Step 3: PROVIDE EXPLANATION FOR EXCLUSION (IF NECESSARY)

Attach additional pages if necessary.

Step 4: SUBMITTAL

Please mail your completed form to Ecology at the appropriate time, either with your VCP application or with a subsequent request for a written opinion. If you complete the form after you enter the VCP, please mail your completed form to the Ecology site manager assigned to your Site. If a site manager has not yet been assigned, please mail your completed form to the Ecology regional office for the County in which your Site is located.

Northwest Region: Attn: Dale Myers 3190 160 th Ave. SE Bellevue, WA 98008-5452	Central Region: Attn: Mark Dunbar 15 W. Yakima Ave., Suite 200 Yakima, WA 98902
Southwest Region: Attn: Bob Warren P.O. Box 47775 Olympia, WA 98504-7775	Eastern Region: Patti Carter N. 4601 Monroe Spokane WA 99205-1295

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360-407-7170. Persons with hearing loss can call 711 for Washington Relay Service. Persons with a speech disability can call 877-833-6341.

POINT OF COMPLIANCE – WAC 173-340-7491(1)(A)

- 1- No contamination present at site.
- 2- All contamination is 15 feet below ground level prior to remedial activities.
- 3- All contamination is six feet below ground level and an institutional control has been implemented as required by WAC 173-340-440.
- 4- All contamination is below a site-specific point of compliance established in compliance with WAC 173-340-7490(4)(b) with an institutional control implemented as required by WAC 173-340-440. *Please provide documentation that describes the rationale for setting a site-specific point of compliance.*

BARRIERS TO EXPOSURE – WAC 173-340-7491(1)(b)

- 5- All contaminated soil, is or will be, covered by physical barriers (such as buildings or paved roads) that prevent exposure to plants and wildlife and an institutional control has been implemented as required by WAC 173-340-440. *An exclusion based on future land use must have a completion date for future development that is acceptable to Ecology.*

Step 2: DOCUMENT BASIS FOR EXCLUSION – CONTINUED

UNDEVELOPED LAND – WAC 173-340-7491(1)(c)

“Undeveloped land” is land that is not covered by building, roads, paved areas, or other barriers that would prevent wildlife from feeding on plants, earthworms, insects, or other food in or on the soil.

“Contiguous” undeveloped land is an area of undeveloped land that is not divided into smaller areas of highways, extensive paving, or similar structures that are likely to reduce the potential use of the overall area by wildlife.

- 6- There is less than one-quarter acre of contiguous undeveloped land on or within 500 feet of any area of the Site and any of the following chemicals is present: chlorinated dioxins or furans, PCB mixtures, DDT, DDE, DDD, aldrin, chlordane, dieldrin, endosulfan, endrin, heptachlor, heptachlor epoxide, benzene hexachloride, toxaphene, hexachlorobenzene, pentachlorophenol, or pentachlorobenzene.
- 7- For sites not containing any of the chemicals mentioned above, there is less than one-and-a-half acres of contiguous undeveloped land on or within 500 feet of any area of the Site.

BACKGROUND CONCENTRATIONS – WAC 173-340-7491(1)(d)

- 8- Concentrations of hazardous substances in soil do not exceed background levels as described in WAC 173-340-709.

Step 3: PROVIDE EXPLANATION FOR EXCLUSION (IF NECESSARY)

Attach additional pages if necessary.

Step 4: SUBMITTAL

Please mail your completed form to Ecology at the appropriate time, either with your VCP application or with a subsequent request for a written opinion. If you complete the form after you enter the VCP, please mail your completed form to the Ecology site manager assigned to your Site. If a site manager has not yet been assigned, please mail your completed form to the Ecology regional office for the County in which your Site is located.

PO Box 47600
Olympia, Washington 98504-7600

Re: Voluntary Cleanup Program Applications
City of Arlington Shooting Range Lead and cPAH Cleanup Projects, Arlington Municipal
Airport, Arlington, Washington

Dear Mr. Meyers:

This letter is being provided to transmit the City of Arlington's (City) applications to enter into the Washington State Department of Ecology (Ecology) Voluntary Cleanup Program (VCP) for the cleanup of two distinct areas of contaminated soil. One area is contaminated with lead shot and the other with carcinogenic polynuclear aromatic hydrocarbons (cPAH) from target fragments. The City is also requesting a no further action determination from Ecology for both areas. We understand from your October 31, 2006 conversation with Dale Carman of our office and Shaw Environmental, Inc. (Shaw) that two separate VCP designations are required in order to apply for two separate remedial action grants.

Project Background

In 2001, the City of Arlington – Arlington Municipal Airport contracted with Shaw to assist the City in developing and implementing a plan to remediate lead- and cPAH-impacted soil at the former shooting range at Arlington Airport as part of Ecology's VCP program. The lead and cPAH were confined to two distinct areas on the site. Shaw performed investigations of the site to determine the extent of lead- and cPAH-impacted soils above regulatory cleanup levels and identified various remedial alternatives for the site, including on-site treatment of lead-impacted soil with cement kiln dust (CKD) and off-site disposal of the cPAH-impacted soil and treated lead-impacted soil. The onsite treatment of the lead-impacted soil and off-site disposal of the cPAH- and treated lead-impacted soil became the preferred remedial option and was approved by Ecology in January 2004.

RECEIVED

JAN 08 2007

DEPT OF ECOLOGY

In 2005, Shaw prepared a Cleanup Action Plan, which was used by Shaw to prepare the project specifications to ensure proper completion of remedial activities at the site. Voluntary cleanup activities occurred on the site between March 13, 2006 and June 21, 2006 resulting in a successful cleanup of the cPAH- and lead-impacted soils to concentrations below the Model Toxics Control Act (MTCA) Method A soil cleanup levels for unrestricted land use.

Issue

Upon review of the enclosed package, the City of Arlington is requesting that Ecology provide the City with two separate Voluntary Cleanup designations, one for the cPAH-impacted area and one for the lead-impacted area.

Justification

The following items provide the City's justification for why two separate VCP designations should be made available to the City:

- Although both areas are located on the former Shooting Range Site, there were two distinct impacted areas.
- Each area (cPAH and lead) could qualify on its own for the VCP program and could have been cleaned up separately at separate times. It was more cost-effective, however, to clean up both impacted sites during one construction season using one contractor.
- The construction project, while encompassing both impacted areas, was advertised as a line item bid as opposed to a lump sum bid in order to specifically separate work associated with each impacted area. Therefore, project costs and product quantities associated with each individual impacted area are easily discernable.
- Each area required distinctly different methods of treatment. While the contractor was able to directly excavate and load the cPAH-impacted soil for disposal, the lead-impacted soil had to be successfully treated and stabilized with CKD prior to being excavated and loaded for disposal.
- The City has proven its dedication to being a good steward to the environment. Prior to this project, the City was involved with two previous Voluntary Cleanup projects: one involving an old mill site, and the other involving the cleanup of a fuel spill by an airport tenant. In addition, the City is currently in the VCP as part of a project involving the

December 15, 2006

removal of old underground tanks in connection with a street project and has been proactive in developing both a Spill Prevention, Control, and Countermeasure (SPCC) Program and fuel regulations requiring mobile fuelers on the Arlington Airport to provide secondary containment.

Additionally, as evidenced in the attached letter, the Honorable Val Stevens, 39th Legislative District, supports the City's position and has provided her own endorsement for this request.

We appreciate your attention to this matter and look forward to your response.

Sincerely,

City of Arlington – Arlington Municipal Airport

Rob Putnam
Airport Manager

Dear Senator Stevens:

Re: Remedial Action Grant Funding for Arlington Airport Former Trap Range

Thank you for your letter of October 11, 2006, regarding Remedial Action Grant funding for the former Arlington Airport Trap Range.

As you note in your letter, Department of Ecology staff have treated the former trap range, which is contaminated with lead shot and pieces of clay pigeons, as a single site. However, there may be more recent information that suggests there are separate areas of contamination.

If recent information is available, the city should provide it to the Voluntary Cleanup Program (VCP) Administrator, Mr. Dale Myers, in our Northwest Regional Office (NWRO) at (425) 649-4446. Mr. Myers will review the information with Ecology technical staff and decide if there are distinct areas of contamination to consider separate sites.

The Remedial Action Grants and Loans state rule (Chapter 173-322 WAC) limits Ecology grant funding for cleanup of VCP sites. The current rule allows 50 percent funding, up to a total grant amount of \$200,000 for individual VCP sites.

Ecology's NWRO staff in Bellevue will continue to work with the City of Arlington to resolve technical and funding issues related to this site. Please feel free to contact me at (360) 407-7001, or Mark Edens in our Northwest Regional Office Toxics Cleanup Program at (425) 649-7070 if you require additional information.

Sincerely,

Jay J. Manning,
Director

October 11, 2006

Jay Manning, Director
Washington State Department of Ecology
P O Box 47600
Olympia WA 98504-7600

Dear Director Manning,

The purpose of this letter is to bring a problem to your attention. Any help you can provide will be greatly appreciated.

As part of your department's Voluntary Cleanup Program, the City of Arlington is remediating toxic lead and carcinogenic hydrocarbon (cPAH) contamination at a former shooting range at the Arlington Airport. The City has worked diligently with Ecology to come up with a cost-effective plan that is good for the community, its businesses, and the environment.

However, because of the way the funding request was originally packaged, it appears DOE may limit the city to one \$200,000 grant. This funding is not sufficient, as it fails to recognize that the lead and cPAH contaminations occur in two distinct areas, both of which create significant costs. The separate cleanup actions and costs should each qualify for separate funding.

As you know, the Model Toxics Control Act tax is tied to petroleum products (i.e. the price of oil). As the price of oil has reached record heights, toxics account balances have also increased dramatically. This means there should be sufficient capacity in the local toxics account to accomplish the primary purpose of the act—to clean up toxic sites.

Before entertaining secondary projects, which funnel MTCA funds away from the core purpose of the Act, the department should focus MTCA dollars where they belong. This project provides an opportunity to demonstrate such a core commitment to toxic cleanup.

Thank you for your consideration of this important matter, in funding two separate grants of \$200,000 for the City of Arlington's clean up projects. I look forward to your response.

Sincerely,

Senator Val Stevens
39th Legislative District

Dear Mr. Putnam:

Re: Request for Review, 1 or 2 "Sites" at Arlington Municipal Airport former Shotgun Range, 18204 59th Dr. NE, Arlington, Washington.

Thank you for submitting the independent remedial action report(s) for this site for the Department of Ecology's (Ecology's) review. Ecology appreciates your initiative in pursuing a voluntary cleanup under the Model Toxics Control Act (MTCA).

Ecology regrets that your request to establish 2 "sites" based on 2 separate releases is not possible at this time. Even though the releases at the former Shotgun Range appear to be distinct, they are from the same activity. Furthermore, MTCA establishes the definition of "site" as equivalent to that of a facility. This decision was arrived at after lengthy consultation with Ecology technical and policy staff at our Toxics Cleanup Program Headquarters as well as staff here in the regional office, and with the Assistant Attorney General assigned to the Voluntary Cleanup Program, Melissa Rourke. This decision is also compatible with similar decisions made in other states.

The review request through our Voluntary Cleanup Program will proceed on the single site unless you direct us otherwise.

Please contact me if you have questions at 425-649-7202.

Sincerely,

Joseph M. Hickey
Voluntary Cleanup Program Coordinator, and
Interim Unit Supervisor

Dear Mr. Putnam:

**Re: Request for Review: Independent Remedial Action
Arlington Municipal Airport, 18204 59th Dr. NE, Arlington, WA**

Thank you for submitting the independent remedial action report(s) for this site for Department of Ecology's (Ecology) review. Ecology appreciates your initiative in pursuing a voluntary cleanup under the Model Toxics Control Act.

This is to acknowledge receipt of your *Application to Request Assistance*. A copy of the *Request* form is enclosed. All correspondence relating to this project should include the site name and a reference to the TCP identification number NW1753.

Ecology will publish a notice in the *Site Register* that we have received the report(s) and of your request for Ecology review of the independent remedial action. The *Site Register* is a bi-weekly publication regarding sites undergoing cleanup or remedial action throughout the state.

If you have any questions about this letter or the Voluntary Cleanup Program (VCP), please do not hesitate to call me at (425) 649-7256 or smas461@ecy.wa.gov.

Sincerely,

Sara Maser
VCP Administrator

Enclosure

Reservation of Rights / No Settlement

This Agreement does not constitute a settlement of liability to the state under MTCA. This Agreement also does not protect a liable person from contribution claims by third parties for matters addressed by the Agreement. The state does not have the authority to settle with any person potentially liable under MTCA except in accordance with RCW 70.105D.040(4). Ecology's signature on this Agreement in no way constitutes a covenant not to sue or a compromise of any Ecology rights or authority.

Ecology reserves all rights under MTCA, including the right to require additional or different remedial actions at the Site should it deem such actions necessary to protect human health and the environment, and to issue orders requiring such remedial actions. Ecology also reserves all rights regarding the injury to, destruction of, or loss of natural resources resulting from the release or threatened release of hazardous substances at the Site.

Effective Date, Modifications, and Severability

The effective date of this Agreement shall be the date on which this Agreement is signed by the Toxics Cleanup Program's Section Manager or delegated representative. This Agreement may be amended by mutual agreement of Ecology and the Client. Amendments shall be in writing and shall be effective when signed by the Toxics Cleanup Program's Section Manager or delegated representative. If any provision of this Agreement proves to be void, it shall in no way invalidate any other provision of this Agreement.

Termination of Agreement

Either party may terminate this Agreement without cause by sending written notice to the other party by certified mail, return receipt requested. The effective date of termination shall be the date Ecology sends notice to the Client or the date Ecology receives notice from the Client, whichever occurs first.

Under this Agreement, the Client is only responsible for costs incurred by Ecology before the effective date of termination. However, termination of this Agreement shall not affect any right Ecology may have to recover its costs under MTCA or any other provision of law.

Representations and Signatures

The undersigned representative of the Client hereby certifies that he or she is fully authorized to enter into this Agreement and to execute and legally bind the Client to comply with the Agreement.

Before submitting the Agreement, please provide the Client's name and the Site's address on the first page and complete the Client's portion of the signature block on the second page. If the application is accepted, Ecology will sign the Agreement and send the Client an acceptance letter that will include the completed Agreement as an enclosure.

Voluntary Cleanup Program

Washington State Department of Ecology
Toxics Cleanup Program

APPLICATION FORM

Under the Voluntary Cleanup Program (VCP), the Department of Ecology (Ecology) may provide informal site-specific technical consultations to persons conducting independent remedial actions at a hazardous waste-site. Ecology may provide such consultations under the authority of the Model Toxics Control Act (MTCA), Chapter 70.105D RCW, and its implementing regulations, Chapter 173-340 WAC.

To request technical consultations under the VCP, you must submit an application to Ecology. That application must include, at a minimum, the following documents:

- VCP Application Form (including required attachments); ← THIS DOCUMENT
- VCP Agreement.

For guidance on how to complete your VCP application, including this Application Form, please refer to the Application Instructions, which are available separately. All of these documents are available for downloading on the VCP web site: <http://www.ecy.wa.gov/programs/tcp/vcp/vcpmain.htm>.

Part 1 - ADMINISTRATION

Client Information: The "Client" is the person or entity seeking informal site-specific technical consultations from Ecology under the VCP. This person must sign the VCP Agreement and is responsible for payment of those costs incurred by Ecology in providing the requested consultative services. Please enter the required information below.

Arlington, WA 98223

Dear Mr. Putnam:

RE: Voluntary Cleanup Program – Feasibility Study Contaminated Soil
Remediation, Former Shooting Range, Arlington Airport, 18204-59th Drive
NE, Arlington, WA, 98223. VCP ID# NW0055.

Thank you for submitting your Feasibility Study Investigation Report of January 15, 2004 and request for Washington State Department of Ecology's (Ecology) review and advice. Ecology appreciates your initiative in pursuing a voluntary cleanup under the Model Toxics Control Act.

Ecology's Toxics Cleanup Program has reviewed the following information regarding the, Former Shooting Range, Arlington Airport, 18204-59th Drive NE, Arlington, WA 98223:

1. Feasibility Study Contaminated Soil Remediation Report, Former Shooting Range – Arlington Airport, WA by IT Corporation, Project 845193 of January 15, 2004.

Based upon the information listed above, Ecology has determined that, at this time:

1. Your proposed preferred remedial alternative of excavation and offsite disposal of the lead and carcinogenic polynuclear aromatic hydrocarbon (CPAH) impacted soils is hereby approved.

Please note that because your actions were not, or will not be conducted under a consent decree with Ecology, this letter is not a settlement by the state under RCW 70.105D.040 (4) and is not binding on the agency. Further action could be required at your site regardless of how strictly you follow Ecology's advice.

Rob Putnam, Airport Manager.
Former Arlington Shooting Range Site
VCP TCP ID #NW0055
January 29, 2004

The opinions presented by Ecology in this letter are made only with respect to the information provided in the report and document(s) listed above. This opinion is only applicable to the specified site (or area of site) and may not be used to justify action at another site (or area of the site).

Ecology does not assume any liability for any release, threatened release or other conditions at the site, or for any actions taken or omitted by any person or his/her agents or employees with regard to the release, threatened release, or other conditions at the site.

Again, thank you for taking the initiative to voluntarily address the contamination at your site. Your efforts are recognized by Ecology as a positive step in our work to protect human health and the environment in Washington State.

If you have any questions regarding this letter, please contact me at (360) 407-7244.

Sincerely,

1.0 Introduction

Shaw Environmental, Inc. (Shaw) was contracted by the City of Arlington (City) in May 2001 to assist the City in developing and implementing a plan to remediate lead-impacted soil at the former shooting range located on the Arlington Municipal Airport property in Arlington, Washington (Figure 1). Based on the results of investigations performed at the site by Shaw and others, which delineated the extent of the lead-impacted soils above regulatory cleanup levels (Figure 2), Shaw conducted a feasibility study for various remedial alternatives at the site (Shaw, 2004). The study results identified on-site treatment of lead-impacted soil with cement kiln dust (CKD) and off-site disposal of the treated soil as the preferred remedial option, and provided a summary of the rationale for selecting this alternative. The feasibility study and conclusions were approved by the Washington State Department of Ecology (Ecology).

A cleanup action plan (CAP) was prepared by Shaw in 2005 in accordance with Chapter 173-340 of the Washington Administrative Code (WAC) – Model Toxics Control Act (MTCA) cleanup regulations (Shaw, 2005). This CAP, including confirmation testing and sampling procedures, was approved by Nnamdi Madakor of Ecology on January 29, 2004. Based on this report, voluntary cleanup activities occurred on the site between March 13, 2006 and June 21, 2006 with the goal of cleaning up lead-impacted soil to concentrations below the MTCA Method A soil cleanup levels for unrestricted land use, with the intent of receiving a “no further action” letter from Ecology.

Based on the CAP, Shaw prepared the technical specifications to be included in contract documents and to be followed for the proper completion of remedial activities at the site (Shaw, 2006).

1.1 Site Location

The site is north of 172nd Street Northeast and approximately 1 mile east of Interstate 5 in Arlington, Washington (Figure 1). The site is located on the Arlington Municipal Airport property south of the airport runways on an unoccupied field that is bounded to the north and west by trees, to the south by 172nd Street Northeast, and to the east by a retail business and open field.

1.2 Site Background

The site was purchased by the U.S. Navy in 1941. The Navy owned and operated the airport and surrounding site property until the City assumed possession in 1959. The site operated as a shooting range from at least 1945 through 1978, and has remained unoccupied since closure of the shooting range (Environmental Associates, Inc., 1998 and airport drawings from September

1944 and January 1945). City personnel have indicated that the site was used for a short time as a sod farm after closure of the shooting range. The concrete bunkers and some other foundations remained after closure of the range. Before the start of remedial activities, the site was covered with grass and used only as public open space.

2.0 Site Preparation

The following sections summarize the work that was completed before soil cleanup activities occurred. Activities performed in preparation for the soil cleanup are detailed below.

2.1 Well Decommissioning

On February 2, 2006, five groundwater monitoring wells located on the former shooting range site were decommissioned in accordance with Ecology rules (WAC 173-160-460). Documentation is included in Appendix A. Shaw removed well monuments, steel risers, and bollards for all of the wells. Well casings were cut off at least 2 feet below ground surface (bgs) and filled with bentonite from the bottom of the casing to ground surface. Before the wells were removed, Metron Surveyors established benchmarks with respect to the well locations for later construction site surveys (see Section 2.3).

2.2 Site Mobilization

Strider Construction Co. Inc. (Strider) was contracted by the City as the general earth work and soil treatment contractor. Strider set up site fencing, a work site trailer and equipment/supply staging area, and general and construction entrances and exits before beginning excavation work. The trailer and staging areas were located toward the east side of the site between the two entry drives off of 51st Avenue Northeast. Additionally, a construction exit to the south of the excavation areas was constructed of quarry spalls for trucks and heavy equipment to exit the site. Figure 3 illustrates the staging areas and hauling routes. The construction exit was constructed to help keep debris from the site off public roads. Large steel plates were used to form temporary roads in high traffic grassy areas. A section of grass and soil was excavated near 172nd Street Northeast, and large quarry stones were used to fill in the excavated area of the construction exit. The quarry rock helped knock off any excess debris that may have been stuck on the truck or truck tires. A silt fence and other support facilities, such as boot wash and eyewash stations, were installed to the south of the bunkers.

2.3 Site Survey

Inca Engineers was hired by Strider to survey the site and stake out a grid over the work zone. Based on the previously established benchmarks, 50-foot by 50-foot grids were marked out to help identify sample locations and record pre-excavation ground elevations. Once the site was surveyed, Strider was able to define the footprint of the lead-impacted soil area. Once the footprint was defined, it was possible to begin excavation and treatment work.

3.0 Lead-impacted Soil Treatment and Excavation

Based on Shaw's Feasibility Study (Shaw, 2004), CKD was selected as the most economical reagent for treating the lead-impacted soil (based on leachable lead concentrations). An initial amount of 10 pounds of CKD per cubic foot (0.10 CKD-soil ratio), determined from Shaw's Treatability Study (Shaw, 2003), was used to treat the impacted soil. Spreading and mixing of the CKD was conducted in accordance with applicable sections of the Portland Cement Association publications, *Suggested Specifications for Soil-Cement Base Course Construction, 2001* and *Soil Cement Construction Handbook*, and as provided in the Technical Specifications (Shaw, 2006).

Prior to treatment of the lead-impacted area, trees (cottonwood and fir) and brush located at the northwest corner of the lead-impacted soil footprint were sampled for total lead and Toxicity Characteristic Leaching Procedure (TCLP)-leachable lead to identify whether biologic uptake of lead had occurred in sufficient quantities to require special handling of the vegetation that required clearing. Once all samples results were returned (which indicated that uptake had occurred, but that leachable concentrations were negligible), Strider cleared the trees from the footprint and the trees were stockpiled for disposal. The vegetation stockpile was disposed of at the Rabanco facility as a non-hazardous solid waste. Sample results for the vegetation samples are included in Appendix B and disposal documentation is in Appendix C.

Porter-Yett Construction was subcontracted by Strider to spread and mix the CKD. The CKD, supplied by LaFarge (Systech Environmental), was hauled to the site by pneumatic highway trailers and transferred directly into a spreader truck. Once applied on the ground (in dry form), field measurements using a drop cloth and fish scale were taken to ensure the proper amount of CKD was being spread over the treatment area. Porter-Yett Construction used a heavy-duty, road-bed tiller to mix the CKD with the soil to a depth of 1 foot bgs. The tiller made three passes per row to ensure proper mixing.

3.1 Performance Monitoring

After the tiller made three passes, composite performance samples of the treated soil were collected in each 50-foot by 50-foot grid and analyzed by U.S. Environmental Protection Agency (EPA) sample preparation Method 1311. The exposed soil below the treated soil was tested for TCLP-leachable lead and by EPA Method 6010/6020 for total lead. A five-point composite sample collected from each grid was prepared in the field by mixing equal portions of soil collected from the center and four corners using stainless steel bowls and mixing spoons. Samples were submitted to Test America in Bothell, Washington in labeled, laboratory-prepared sampling containers following proper chain-of-custody protocols. After each sample was

collected, equipment used to collect and mix samples was decontaminated using Liquinox™ solution and de-ionized water rinse. No material was loaded or hauled off site until sample results were returned from the laboratory. During the first treatment, 432 tons of CKD was spread over the treatment area. Weight tickets are included in Appendix D.

Performance sample results indicated that treatment of approximately one-half of the site did not sufficiently lower TCLP-leachable lead concentrations to below 5 milligrams per liter (mg/L) (i.e., did not stabilize the lead to the point that it could be disposed as a non-hazardous waste). After running a series of bench tests, it was determined that an additional 15 pounds of CKD per cubic foot of soil (0.25 total CKD-soil ratio) would be required to achieve TCLP results below 5 mg/L for the area that required retreatment.

The lead-impacted soil was retreated on May 17, 2006 by adding an additional 15 pounds of CKD per cubic foot. Porter-Yett Construction mixed in the CKD with the large tiller, and performance samples were recollected from the retreated grid locations to evaluate the performance of the second treatment. The second application of CKD was successful; all grids passed the TCLP-leachable lead criteria. Final performance monitoring results are illustrated in Figure 4. Approximately 350 tons of CKD was spread during the second application. Performance sample results are included in Appendix B and summarized in Table 1.

After all the sample results were returned from the laboratory, paperwork was filed with the landfill (Appendix C) and trucks were scheduled to haul soil. All excavated soil was stockpiled in the previously excavated footprint until it was loaded and shipped off site. Confirmation samples were collected at 500-ton intervals per landfill acceptance criteria. A water truck was stationed at the construction exit to water down the soil in the shipping containers to minimize fugitive dust. Shaw inspected each load to ensure that there was no free liquid being hauled off site and leaking onto roadways. An estimated volume of 3,815 cubic yards of lead-impacted soil was excavated and removed from the site. Landfill-generated weight tickets confirmed that 5,781.09 tons of lead-impacted soil were received from the site and disposed. Lead weight tickets are included in Appendix E.

3.2 Confirmation Sampling

After soil excavation and removal, five-point confirmation samples were collected from each grid and analyzed by EPA Method 6020 to verify that the lead concentrations at the exposed subgrade were below the MTCA Method A soil clean up level of 250 milligrams per kilogram for unrestricted land use. All samples were below the cleanup level for the total lead except grids C11, D11, and D12. Soil samples were collected from the grid with the highest concentration of total lead (C11) and bench tests were run to determine how much additional CKD would be needed for the proper treatment of the soil.

After determining the proper amount of CKD needed to treat the remaining subgrade of the three grids, the grids were scraped down approximately 3 to 6 inches. The removed soil was stockpiled in the previously cleared excavation area. Confirmation samples were collected from the three cleared grids that confirmed that total lead concentrations were below the MTCA Method A cleanup level. Final total lead confirmation sampling results are illustrated in Figure 5.

Based on the test results of the confirmation testing, the lead-contaminated soils previously characterized on the site have been removed and the subgrade concentration of lead is below the MTCA Method A cleanup level.

For the additional soil that was removed from grids C11, D11, and D12 to achieve the cleanup level at the subgrade, approximately 18 tons of CKD was added to the stockpiled soil and folded in using an excavator. Once the CKD was adequately mixed with the soil, samples were collected again to ensure the treated soil was below the TCLP leachable lead criteria and could be disposed of as non-hazardous waste. Confirmation sample results are included in Appendix B and summarized in Table 2. The last of the treated soil was loaded and sent to the landfill on June 21, 2006.

4.0 Site Restoration

After all the remedial activities were completed, Strider decontaminated the heavy equipment on site. Inca Engineers resurveyed the excavated areas to determine the total volume of soil removed. Inca's final survey results are included in Appendix F. Inca's results were confirmed with returned weight tickets from the landfill. A table summarizing all the loads taken from the site and associated weights is attached in Appendix G.

Once the final survey was completed, Strider flattened/smoothed the edges of the excavated areas per the specifications to an approximate slope of 5H:1V using a bulldozer, and rocks and debris were raked from excavation areas. Construction fencing and temporary facilities were removed from the site. Construction roads and exits, including metal plates and quarry spalls, were also removed. The City is planning to seed in winter 2006 or spring 2007 once consistent rainfall is assured to enable germination.

5.0 Conclusions and Recommendations

The goal of this voluntary cleanup was to remove lead-impacted soil to concentrations below the MTCA Method A soil cleanup level for unrestricted land use.

With the successful excavation, treatment, and removal of the lead-impacted soils from the site, this goal has been achieved. Based upon the work that occurred on site and the attached sample results, Shaw will request a “no further action” determination from Ecology.

PROJECT NAME: Arlington Airport, Former Shotgun Range PROJECT NO.:

FIELD ACTIVITY SUBJECT: Well Decommissioning, Well Monument Removal

DESCRIPTION OF DAILY ACTIVITY AND EVENTS

- ① Arrived on site @ 10:00.
- ② Filled out a job safety analysis with Roger Roden.
- ③ Cascade Drilling arrived on site at 10:03.
- ④ Had a brief safety meeting.
- ⑤ Began well abandonment at 10:15. Wells were wrap-sealed in place in accordance with the Minimum Standards for Construction & Maintenance of Wells (Ch. 173-160 WAC). Renovation of well monument was required & performed by Shaw employees after all five wells had been decommissioned. Monuments were removed using a chain & a company truck. Monuments were piled on site next to concrete bunkers & holes were filled in with dirt.
- ⑥ off site at 11:30.

VISITORS ON SITE: Cascade Drilling

Does this waste or generating process contain regulated concentrations of the following Pesticides and/or Herbicides: Chlordane, Endrin, Heptachlor (and it epoxides), Lindane, Methoxychlor, Toxaphene, 2,4-D, or 2,4,5-TP Silvex as defined in 40 CFR 261.33?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Does this waste or generating process cause it to exceed OSHA exposure limits from high levels of Hydrogen Sulfide or Hydrogen Cyanide as defined in 40 CFR 261.23?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Does this waste contain regulated concentrations of Polychlorinated Biphenyls (PCBs) as defined in 40 CFR Part 761?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Does this waste contain regulated concentrations of listed hazardous wastes defined in 40 CFR 261.31, 261.32, 261.33, including RCRA F-Listed Solvents?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Does this waste contain regulated concentrations of 2,3,7,8-Tetrachlorodibenzodioxin (2,3,7,8-TCDD), or any other dioxin as defined in 40 CFR 261.31?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Is this a regulated Toxic Material as defined by Federal and/or State regulations?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Is this a regulated Radioactive Waste as defined by Federal and/or State regulations?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Is this a regulated Medical or Infectious Waste as defined by Federal and/or State regulations?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No
Is this waste generated at a Federal Superfund Clean Up Site?	<input type="checkbox"/> Yes or <input checked="" type="checkbox"/> No

VI. Generator Certification

I hereby certify that to the best of my knowledge and belief, the information contained herein is a true, complete and accurate description of the waste material being offered for disposal and all known or suspected hazards have been disclosed. All Analytical Results/Material Safety Data Sheets submitted are truthful and complete and are representative of the waste. I further certify that by utilizing this profile, neither myself nor any other employee of the company will deliver for disposal or attempt to deliver for disposal any waste which is classified as toxic waste, hazardous waste or infectious waste, or any other waste material this facility is prohibited from accepting by law. I shall immediately give written notice of any change or condition pertaining to the waste not provided herein. Our company hereby agrees to fully indemnify this disposal facility against any damages resulting from this certification being inaccurate or untrue. I further certify that the company has not altered the form or content of this profile sheet as provided by Allied Waste.

Re: Arlington Airport Shotgun Range Cleanup – Solid Waste Disposal – Response to Comments

Dear Ms. Dillashaw:

This letter has been prepared by Shaw Environmental, Inc. (Shaw), on behalf of Arlington Municipal Airport (as authorized by the executed Third Party Authorization Form) to address questions from Rabanco/Allied Waste contained in an email from you on May 26, 2006 pertaining to the acceptance of lead-impacted soils from the Former Shotgun Range at Arlington Airport in Washington. The following address these questions:

1. A completed change form adding other representative samples and increased volume is attached.
2. Amended laboratory report for sample BPD0187-RE1 with explanation of lab error and reanalysis is attached.
3. All areas of the site where samples results indicated TCLP lead concentrations greater than 5 mg/L (as shown on the grid map attached to the Representative Sample Certification dated 4/19/06) were re-treated with cement kiln dust (CKD) for lead stabilization in the soils. The quantity of CKD use for re-treatment was determined based on a bench scale study conducted on the non-passing soils with the highest TCLP lead concentrations. Re-treatment consisted of applying 15 pounds of CDK per cubic foot of soil and tilling into the soil until soil was completely homogenized. After re-treatment was performed, the retreated grid areas were all resampled on 5/17/06 and analyzed via TCLP to confirm that the soils meet disposal criteria. These results are included with the Representative Sample Certification –Addendum #1 – 5/25/06.

We hope that this letter adequately addresses your concerns.

Sincerely,
SHAW ENVIRONMENTAL, INC.

CHANGE TO SPECIAL WASTE PROFILE SHEET

This form may be used to request changes to an existing Special Waste Profile.			
Generator Name:	Arlington Municipal Airport/City of Arlington		
Name of Waste:	lead contaminated soil	Approval Number:	
Description of Change Requested:			
Volume Increase:	Add estimated 1700 Cubic Yards (total estimated volume = 3,200 Cubic Yards)		
Extend Expiration Date:			
Representative Samples:	Add samples identified on Representative Sample Certification - Addendum #1- 5/25/06		
REASON FOR CHANGE: (Provide detailed explanation of why the change is requested).			
Initial Generator Waste Profile Sheet (signed 4/19/06) included only those soils at the former shotgun range which were shown, through laboratory analysis, to have TCLP lead concentrations less than 5 mg/L. After retreatment of the soils whose concentrations were previously greater than 5 mg/L with CKD, these soils have now also been shown, through laboratory analysis, to have TCLP lead concentrations less than 5 mg/L. Arlington Municipal Airport would now also like to dispose of these soils at the Rabanco Regional Disposal facility.			
I hereby certify that the waste and the process generating the waste are unchanged and are accurately represented in the original profile.

CASE NARRATIVE FOR BPD0187

Client: Shaw E&I
Project Manager: Piper Roelen
Project Name: Arlington Shotgun Range
Project Number: 116777

1.0 DESCRIPTION OF CASE

Thirty-two soil samples were submitted for the analysis of:

- TCLP Metals (Lead) by EPA 1311/6000 Series Methods

2.0 COMMENTS ON SAMPLE RECEIPT

The samples were received April 7, 2006.

3.0 PREPARATIONS AND ANALYSIS

TCLP Metals by EPA 1311/6000 Series Methods

Upon receipt of the completed analytical results the client inquired as to the method used to measure the sample pH for determination of which TCLP extraction fluid to use for leaching (steps 7.1.4.1-7.1.4.4 of the TCLP method). I indicated to the client pH paper strips were used to measure the pH at this step of the process, and that extraction fluid #2 was used for all samples since the final pH measurement for all samples was measured to be above 5.

The client pointed out that EPA method 1311 as written does not call for pH paper strips to be used at this step of the procedure and that 5 samples be re-processed using a pH meter to measure the pH, at steps 7.1.4.1-7.1.4.4 of the TCLP method, rather than paper strips.

The following samples were re-processed for pH measurement using a pH probe rather than paper strips, and the resulting initial and final measurements are indicated.

BPD0187-04 - 10.82, 5.38
BPD0187-06 - 10.76, 5.95
BPD0187-17 - 10.86, 6.10
BPD0187-20 - 10.53, 4.21
BPD0187-26 - 10.86, 6.59

Since the final pH determination for laboratory sample BPD0187-20 was measured at 4.21 using a pH meter, it was re-processed for TCLP Lead using extraction fluid #1 per the method. The accompanying report includes the TCLP Lead results for both extraction fluids used for BPD0187-20.

Material Safety Data Sheet

Section 1: PRODUCT AND COMPANY INFORMATION

Product Name(s): Cement Kiln Dust

Product Identifiers: Cement Kiln Dust (CKD), Kiln Dust, Cement Lime

Manufacturer: Lafarge North America Inc.
12950 Worldgate Drive, Suite 500
Herndon, VA 20170

Information Telephone Number: 703-480-3600 (9am to 5pm EST)

Emergency Telephone Number: 1-800-451-8346 (3E Hotline)

Product Use: Kiln dust used in the manufacture of bricks, mortar, cement, concrete, plasters, paving materials, and other construction applications.

Note: This MSDS covers many types of kiln dust. Individual composition of hazardous constituents will vary between types of kiln dust.

Section 2: COMPOSITION/INFORMATION ON INGREDIENTS

Component	Percent (By Weight)	CAS Number	OSHA PEL -TWA (mg/m ³)	ACGIH TLV-TWA (mg/m ³)	LD ₅₀ (mouse, intraperitoneal)	LC ₅₀
Portland Cement Kiln Dust	100	68475-76-3	NA	NA	NA	NA
Calcium Carbonate*	10-80	1317-65-3	15 (T); 5 (R)	10 (T)	NA	NA
Calcium Oxide	5-30	1305-78-8	5 (T)	2 (T)	3059 mg/kg	NA
Crystalline Silica	0-10	14808-60-7	[(10) / (%SiO ₂ +2)] (R); [(30) / (%SiO ₂ +2)] (T)	0.05 (R)	NA	NA
Magnesium Oxide	0-2	1309-48-4	15 (T)	10 (T)	NA	NA

Note: Exposure limits for components noted with an * contain no asbestos and <1% crystalline silica

Cement is made from materials mined from the earth and is processed using energy provided by fuels. Trace amounts of chemicals may be detected during chemical analysis of cement and cement kiln dust. For example, cement kiln dust may contain trace amounts of potassium and sodium sulfate compounds, chromium compounds, nickel compounds, and other trace compounds.

Section 3: HAZARD IDENTIFICATION

	<p>Corrosive - Causes severe burns. Toxic - Harmful by inhalation. (Contains crystalline silica)</p> <p>Use proper engineering controls, work practices, and personal protective equipment to prevent exposure to wet or dry product.</p> <p>Read MSDS for details.</p>	
---	---	---

Section 3: HAZARD IDENTIFICATION (continued)

Emergency Overview: Kiln dust is a solid, grey or tan, odorless powder. It is not combustible or explosive. A single, short-term exposure to the dry powder presents little or no hazard. Exposure of sufficient duration to wet kiln dust, or to dry kiln dust on moist areas of the body, can cause serious, potentially irreversible tissue (skin, eye, respiratory tract) damage due to chemical (caustic) burns, including third degree burns.

Potential Health Effects:

Eye Contact: Airborne dust may cause immediate or delayed irritation or inflammation. Eye contact with large amounts of dry powder or with wet kiln dust can cause moderate eye irritation, chemical burns and blindness. Eye exposures require immediate first aid and medical attention to prevent significant damage to the eye.

Skin Contact: Kiln dust may cause dry skin, discomfort, irritation, severe burns, and dermatitis.

Burns: Exposure of sufficient duration, to wet kiln dust, or to dry kiln dust on moist areas of the body, can cause serious, potentially irreversible damage to skin, eye, respiratory and digestive tracts due to chemical (caustic) burns, including third degree burns. A skin exposure may be hazardous even if there is no pain or discomfort.

Kiln dust may be shipped or stored hot and can cause thermal burns to unprotected skin.

Dermatitis: Kiln dust is capable of causing dermatitis by irritation and allergy. Skin affected by dermatitis may include symptoms such as, redness, itching, rash, scaling, and cracking.

Irritant dermatitis is caused by the physical properties of kiln dust including alkalinity and abrasion.

Allergic contact dermatitis is caused by sensitization to hexavalent chromium (chromate) present in kiln dust. The reaction can range from a mild rash to severe skin ulcers. Persons already sensitized may react to the first contact with kiln dust. Others may develop allergic dermatitis after years of repeated contact with kiln dust.

Inhalation (acute): Breathing dust may cause nose, throat or lung irritation, including choking, depending on the degree of exposure. Inhalation of high levels of dust can cause chemical burns to the nose, throat and lungs.

Inhalation (chronic): Risk of injury depends on duration and level of exposure.

Silicosis: This product contains crystalline silica. Prolonged or repeated inhalation of respirable crystalline silica from this product can cause silicosis, a seriously disabling and fatal lung disease. See Note to Physicians in Section 4 for further information.

Carcinogenicity: Kiln dust is not listed as a carcinogen by IARC or NTP; however, kiln dust contains trace amounts of crystalline silica and hexavalent chromium which are classified by IARC and NTP as known human carcinogens.

Autoimmune Disease: Some studies show that exposure to respirable crystalline silica (without silicosis) or that the disease silicosis may be associated with the increased incidence of several autoimmune disorders such as scleroderma (thickening of the skin), systemic lupus erythematosus, rheumatoid arthritis and diseases affecting the kidneys.

Section 3: HAZARD IDENTIFICATION (continued)

Tuberculosis: Silicosis increases the risk of tuberculosis.

Renal Disease: Some studies show an increased incidence of chronic kidney disease and end-stage renal disease in workers exposed to respirable crystalline silica.

Ingestion: Do not ingest kiln dust. Although ingestion of small quantities of kiln dust is not known to be harmful, large quantities can cause chemical burns in the mouth, throat, stomach, and digestive tract.

Medical Conditions Aggravated by Exposure: Individuals with lung disease (e.g. bronchitis, emphysema, COPD, pulmonary disease) or sensitivity to hexavalent chromium can be aggravated by exposure.

Section 4: FIRST AID MEASURES

Eye Contact: Rinse eyes thoroughly with water for at least 15 minutes, including under lids, to remove all particles. Seek medical attention for abrasions and burns.

Skin Contact: Wash with cool water and a pH neutral soap or a mild skin detergent. Seek medical attention for rash, burns, irritation, dermatitis, and prolonged unprotected exposures to wet cement or kiln dust, cement mixtures or liquids from wet cement.

Inhalation: Move person to fresh air. Seek medical attention for discomfort or if coughing or other symptoms do not subside.

Ingestion: Do not induce vomiting. If conscious, have person drink plenty of water. Seek medical attention or contact poison control center immediately.

Note to Physician: The three types of silicosis include:

- Simple chronic silicosis – which results from long-term exposure (more than 20 years) to low amounts of respirable crystalline silica. Nodules of chronic inflammation and scarring provoked by the respirable crystalline silica form in the lungs and chest lymph nodes. This disease may feature breathlessness and may resemble chronic obstructive pulmonary disease (COPD).
- Accelerated silicosis – occurs after exposure to larger amounts of respirable crystalline silica over a shorter period of time (5-15 years). Inflammation, scarring, and symptoms progress faster in accelerated silicosis than in simple silicosis.
- Acute silicosis – results from short-term exposure to very large amounts of respirable crystalline silica. The lungs become very inflamed and may fill with fluid, causing severe shortness of breath and low blood oxygen levels.

Progressive massive fibrosis may occur in simple or accelerated silicosis, but is more common in the accelerated form. Progressive massive fibrosis results from severe scarring and leads to the destruction of normal lung structures.

Section 5: FIREFIGHTING MEASURES

Flashpoint & Method:	Non-combustible	Firefighting Equipment:	Kiln dust poses no fire-related hazard. A SCBA is recommended to limit exposures to combustion products when fighting any fire.
General Hazard:	Avoid breathing dust. Wet kiln dust and cement is caustic.	Combustion Products:	None.
Extinguishing Media:	Use extinguishing media appropriate for surrounding fire.		

Section 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION (continued)

Skin Protection: Wear gloves, boot covers and protective clothing impervious to water to prevent skin contact. Do not rely on barrier creams, in place of impervious gloves. Remove clothing and protective equipment that becomes saturated with wet kiln dust or cement and immediately wash exposed areas.

Section 9: PHYSICAL AND CHEMICAL PROPERTIES

Physical State:	Solid (powder).	Evaporation Rate:	NA.
Appearance:	Gray, tan, or white powder.	pH (in water):	10 – 13
Odor:	None.	Boiling Point:	>1000° C
Vapor Pressure:	NA.	Freezing Point:	None, solid.
Vapor Density:	NA.	Viscosity:	None, solid.
Specific Gravity:	2.6-2.8	Solubility in Water:	2-20%

Section 10: STABILITY AND REACTIVITY

Stability: Stable. Keep dry until use. Avoid contact with incompatible materials. Kiln dust reacts with water, resulting in a slight release of heat, depending on the amount of lime (Calcium oxide) present.

Incompatibility: Kiln dust and wet cement is alkaline and is incompatible with acids, ammonium salts and aluminum metal. Kiln dust and cement dissolves in hydrofluoric acid, producing corrosive silicon tetrafluoride gas. Kiln dust and cement reacts with water to form silicates and calcium hydroxide. Silicates react with powerful oxidizers such as fluorine, boron trifluoride, chlorine trifluoride, manganese trifluoride, and oxygen difluoride.

Hazardous Polymerization: None.

Hazardous Decomposition: None.

Section 11 and 12: TOXICOLOGICAL AND ECOLOGICAL INFORMATION

For questions regarding toxicological and ecological information refer to contact information in Section 1.

Section 13: DISPOSAL CONSIDERATIONS

Dispose of waste and containers in compliance with applicable Federal, State, Provincial and Local regulations.

Section 14: TRANSPORT INFORMATION

This product is not classified as a Hazardous Material under U.S. DOT or Canadian TDG regulations.

Section 15: REGULATORY INFORMATION

OSHA/MSHA Hazard Communication: This product is considered by OSHA/MSHA to be a hazardous chemical and should be included in the employer's hazard communication program.

CERCLA/SUPERFUND: This product is not listed as a CERCLA hazardous substance.

EPCRA SARA Title III: This product has been reviewed according to the EPA Hazard Categories promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 and is considered a hazardous chemical and a delayed health hazard.

EPCRA SARA Section 313: This product contains none of the substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372.

Section 15: REGULATORY INFORMATION (continued)

- RCRA:** If discarded in its purchased form, this product would not be a hazardous waste either by listing or characteristic. However, under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product should be classified as a hazardous waste.
- TSCA:** Kiln dust and crystalline silica are exempt from reporting under the inventory update rule.
- California Proposition 65:** Crystalline silica (airborne particulates of respirable size) and Chromium (hexavalent compounds) are substances known by the State of California to cause cancer.
- WHMIS/DSL:** Products containing crystalline silica and calcium carbonate are classified as D2A, E and are subject to WHMIS requirements.
-

RE: CITY DIRECTORY RESEARCH
Proposed Arlington Airport Business Park Development II
51st Avenue NE & 43rd Avenue NE Arlington, WA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

17222-17820 of 43rd AVE NE
All of 51st AVE NE

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Zone subtype:

Flood Zone X-01

Zone: X
Zone subtype: 0.2 PCT ANNUAL CHANCE FLOOD HAZARD

Flood Zone X-12

Zone: X
Zone subtype: AREA OF MINIMAL FLOOD HAZARD

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Qg1o

Unit Name:	Younger glacial drift
Unit Age:	Pleistocene
Primary Rock Type:	outwash
Secondary Rock Type:	stratified drift
Unit Description:	Advance and recessional outwash, stratified drift, and associated deposits. Primarily silt, sand, and gravel with some clay. Includes alluvium locally and scabland deposits of eastern Washington.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 13 (35.96%)

Map Unit Name: Custer fine sandy loam
Bedrock Depth - Min:
Watertable Depth - Annual Min: 38cm
Drainage Class - Dominant: Poorly drained
Hydrologic Group - Dominant: C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Custer(85%)
horizon H1(0cm to 23cm) Fine sandy loam
horizon H2(23cm to 89cm) Sand
horizon H3(89cm to 152cm) Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 13 - Custer fine sandy loam

Component: Custer (85%)

The Custer, undrained component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on outwash plains. The parent material consists of glacial outwash. Depth to a root restrictive layer, strongly contrasting textural stratification, is 20 to 40 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 0 inches during January, February, March, November, December. Organic matter content in the surface horizon is about 8 percent. Nonirrigated land capability classification is 5w. This soil meets hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Norma (5%)

Generated brief soil descriptions are created for major soil components. The Norma, undrained soil is a minor component.

Component: Indianola (5%)

Generated brief soil descriptions are created for major soil components. The Indianola soil is a minor component.

Component: Custer (5%)

Generated brief soil descriptions are created for major soil components. The Custer, drained soil is a minor component.

Map Unit 30 (28.05%)

Map Unit Name: Lynnwood loamy sand, 0 to 3 percent slopes
Bedrock Depth - Min:
Watertable Depth - Annual Min:
Drainage Class - Dominant: Somewhat excessively drained
Hydrologic Group - Dominant: A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Lynnwood(85%)
horizon H1(0cm to 2cm) Loamy sand
horizon H2(2cm to 74cm) Loamy sand
horizon H3(74cm to 152cm) Sand

Component Description:

Soil Information

Minor map unit components are excluded from this report.

Map Unit: 30 - Lynnwood loamy sand, 0 to 3 percent slopes

Component: Lynnwood (85%)

The Lynnwood component makes up 85 percent of the map unit. Slopes are 0 to 3 percent. The parent material consists of glacial outwash. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria.

Component: Custer (5%)

Generated brief soil descriptions are created for major soil components. The Custer, undrained soil is a minor component.

Map Unit 34 (0.21%)

Map Unit Name: Mukilteo muck

Bedrock Depth - Min:

Watertable Depth - Annual Min: 0cm

Drainage Class - Dominant: Very poorly drained

Hydrologic Group - Dominant: B/D - These soils have moderately low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Mukilteo(85%)

horizon H1(0cm to 10cm)	Muck
horizon H2(10cm to 89cm)	Mucky peat
horizon H3(89cm to 137cm)	Mucky peat
horizon H4(137cm to 152cm)	Fine sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 34 - Mukilteo muck

Component: Mukilteo (85%)

The Mukilteo, drained component makes up 85 percent of the map unit. Slopes are 0 to 1 percent. This component is on depressions. The parent material consists of herbaceous organic material. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is very poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 0 inches during January, February, December. Organic matter content in the surface horizon is about 40 percent. Nonirrigated land capability classification is 3w. This soil meets hydric criteria.

Component: Terric Medisaprists (5%)

Generated brief soil descriptions are created for major soil components. The Terric Medisaprists, undrained soil is a minor component.

Component: Mukilteo (5%)

Generated brief soil descriptions are created for major soil components. The Mukilteo, undrained soil is a minor component.

Component: Orcas (5%)

Generated brief soil descriptions are created for major soil components. The Orcas soil is a minor component.

Map Unit 39 (35.78%)

Map Unit Name: Norma loam

Bedrock Depth - Min:

Soil Information

Watertable Depth - Annual Min: 0cm
Drainage Class - Dominant: Poorly drained
Hydrologic Group - Dominant: B/D - These soils have moderately low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Norma(85%)

horizon H1(0cm to 25cm)	Ashy loam
horizon H2(25cm to 71cm)	Sandy loam
horizon H3(71cm to 152cm)	Sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 39 - Norma loam

Component: Norma (85%)

The Norma, undrained component makes up 85 percent of the map unit. Slopes are 0 to 3 percent. This component is on depressions, drainageways, till plains. The parent material consists of alluvium. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 0 inches during January, February, March, April, November, December. Organic matter content in the surface horizon is about 10 percent. Nonirrigated land capability classification is 5w. This soil meets hydric criteria.

Component: Norma (5%)

Generated brief soil descriptions are created for major soil components. The Norma, drained soil is a minor component.

Component: Bellingham (5%)

Generated brief soil descriptions are created for major soil components. The Bellingham, undrained soil is a minor component.

Component: Terric Medisaprists (5%)

Generated brief soil descriptions are created for major soil components. The Terric Medisaprists, undrained soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SNOHOMISH* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SNOHOMISH* County

No Measures/Homes:	63
Geometric Mean:	0.1
Arithmetic Mean:	0.2
Median:	0.1
Standard Deviation:	0.3
Maximum:	1.4
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of Washington conducted during 1991-92. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells

OGW

Oil and gas wells sites made available by the Department of Natural Resources.

Public Water System Source Information

PWS

The Public Water System Source Information database contains information pertaining to Washington State public water systems. The data provides a listing of all Active Water Systems and Source Information based on the selected water system group and county. This data is provided by Washington State's Department of Health. Public Land Survey System (PLSS) locations provided by the source are subject to accuracy limitations inherent to the PLSS system.

Underground Injection Control Wells

UIC

The Water Quality Program of the Washington State Department of Ecology (DEC) maintains this water quality permit database that includes Underground Injection Control (UIC) wells. According to the DEC, UIC wells are manmade structures used to discharge fluids into the subsurface. Examples are drywells, infiltration trenches with perforated pipe, and any structure deeper than the widest surface dimension. The majority of UIC wells in Washington are used to manage storm water and sanitary waste, return water to the ground, and help clean up contaminated sites. The potential for groundwater contamination from injection wells depends upon well construction and location; quality of the fluids injected; and the geographic and hydrologic settings in which the injection occurs.

Washington State Well Log Database

WATER WELLS

The Well Log Database contains the well reports that describe the location, ownership, construction details and lithology of the completed wells in State of Washington. Locations are provided as Public Land Survey System (PLSS) values and accuracy is limited as such. The database is maintained by Washington State, Department of Ecology.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice.
